OASIS

Open the Access to Life
Science Infrastructures for SMEs

Project No. 619230

Deliverable 5.2
Second OASIS webinar report

Date of Delivery	24th of December 2015
Authors	Vaclovas Radvilas, Sergio Saez
Dissemination level	Public
WP	5
Keywords	webinar, online conference
Description	This deliverable summarises the second OASIS webinar held on 1st of October in Terrassa, Spain.

1 Overview

On 1st of October, 2015 the second OASIS webinar took place. The event was organised by the WP5 leader, SECPhO cluster and was managed from the cluster´s office in Terrassa, Spain.

The idea behind OASIS webinars was to invite the European SMEs working in photonics applications in Life Sciences to get to know better what is the OASIS project and, most importantly, to present the future workshops that will be organised in coming months. After the first webinar, more attention was put to the quality of the webinar itself that led to a success with increased outreach.

2 Results

In order to increase the webinar quality and avoid any previous technical disturbances, the Cisco Webex online conferencing tool was used this time. The use of this tool offered better control of the conference and participants´ settings, was easy to operate and is adapted to host more attendees.

Webinar results and comments:

- the number of online webinar attendees was registered to be 30 in total;
- the conference was recorded and put on the official OASIS website in separate videos of each presentation. These videos can be found on the following link: http://www.fp7-oasis.eu/Downloads;
- all consortium members and webinar attendees were informed about the possibility of accessing the presentations on OASIS website;
- the final number of video plays of both the 1st and 2nd webinar will be indicated at the end of the project in the KPIs report;
- Cisco Webex online conferencing tool proved to be the best option for organising and managing the webinar.

3 Annexes

OASiS
Open the Access to Life Science Infrastructures for SMEs

OASIS (http://www.fp7-oasis.eu/) team is happy to invite you to the second webinar where next 5 workshops and hosting research facilities will be presented.

OASIS workshops are dedicated to bringing together European SMEs and R&D facilities to network and **build collaborative projects for Horizon2020** calls related with photonics applications in Life Sciences. These workshops involve:

1) info sessions on Horizon2020 calls related to workshop topic,
2) research facility visits,
3) SME presentations and
4) B2B meetings oriented to new consortia creation.

Save the date! **1st of October, 2015.**

Agenda:

Time	Workshop Title	Speaker
14:50 – 15:00	Registration	
15:00 – 15:10	Welcome. OASIS project presentation	Katia Mirochnitchenko
15:10 – 15:20	**Imaging and Biophotonics** (04/11/ 2015) *CERIMED: European Center for Research in Medical Imaging* Marseille, France	Pascal Belin
15:20 – 15:30	**Ultrafast Science and Biomedical Optics** (25/11/2015) *CUSBO/ POLIMI, Milano, Italy*	Roberta Ramponi
15:30 – 15:40	**Spectral Imaging for Life Sciences "Beyond Vision"** (21/01/2016) *University of Amsterdam, Amsterdam, Netherlands*	Maurice Aalders
15:40 – 15:50	**Light Sources for Applications in Life Sciences** (25/02/2016) *Swansea University, Wales, UK*	Karin Ennser
15:50 – 16:00	**Photonic Solutions for Veterinary and Agriculture** (May/2016) *SVA: National Veterinary Institute, Uppsala, Sweden*	Pierre-Yves Fonjallaz

*each presentation will be followed by a short Q&A session.

Targeted applications

- MEDICINE/HEALTHCARE
- PHARMACEUTICS
- FOOD AND WATER SAFETY
- AGRICULTURE
- BIOLOGY
- COSMETICS
- VETERINARY MEDICINE
- FORENSIC SCIENCE
