<b>1.</b>	<b>Summary description of the deliverable content and purpose .....</b>	<b>3</b>
<b>2.</b>	<b>Deliverable Report .....</b>	<b>4</b>
2.1	NANOBITS PUBLIC WEBSITE .....	4
2.2	NANOBITS CONFIDENTIAL AREA .....	6

## 1. Summary description of the deliverable content and purpose

The installation of a website figuring the current project is an essential tool for getting the project published as well as for improving the effectiveness of cooperation and communication among the consortium partners. This is thus one of the main goals of project management.

We installed a homepage on [www.nanobits-project.eu](http://www.nanobits-project.eu) that will give a first informative impression of the project. A structured set-up from left to right enables a good introduction into complex project subjects. Menu listing and login form on the left side, a short text and a SEM-image in the center explain the main topic, and a calendar giving a project overview on the right side let the reader get interested to go into detail. The newly created NanoBits logo together with the EC and partner logos build the frame of the project topics and are important recognition factors.

The subtitles

- NanoBits at a Glance
- NanoBits Partners
- NanoBits Movie
- NanoBits Publication
- Contact

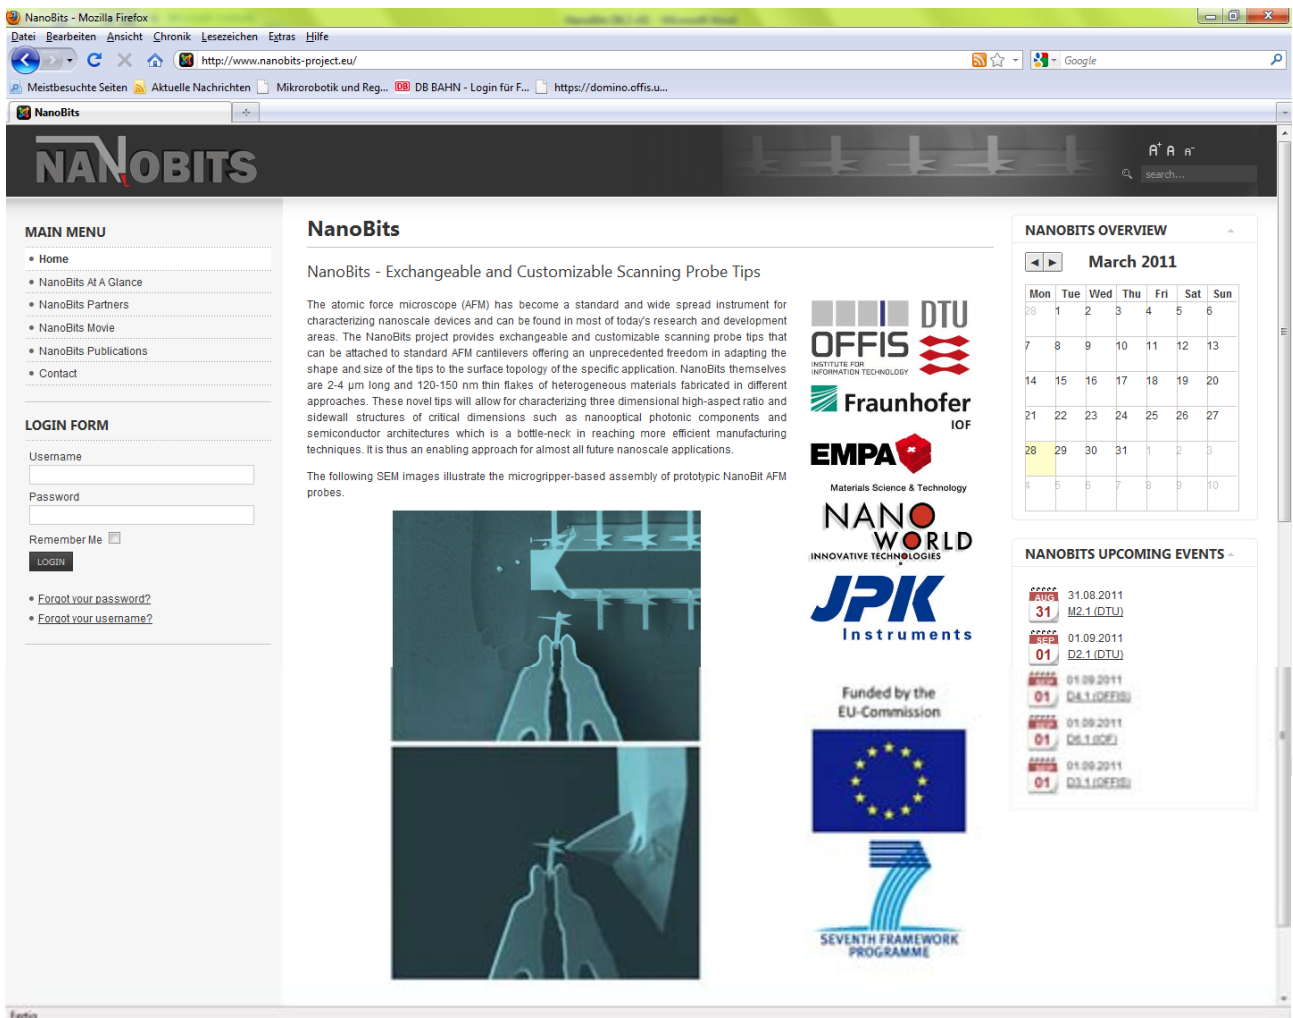

are made for the interested general public. Within these categories, the visitor will learn about the consortium structure, each consortium partner, papers already published and an appealing movie about the project.

With a personal login all registered consortium partners have access to the NanoBits partner area, where all confidential documents are stored into different directories. This serves as a library and archive as well as exchange of relevant documents. This category enables a good, efficient and an up-to-date cooperation and simplifies and shortens all work routines.

On the NanoBits website, all categories will be actualized and amended during the project run, so that the interested public and the people involved will get the latest project information and developments.

## 2. Deliverable Report

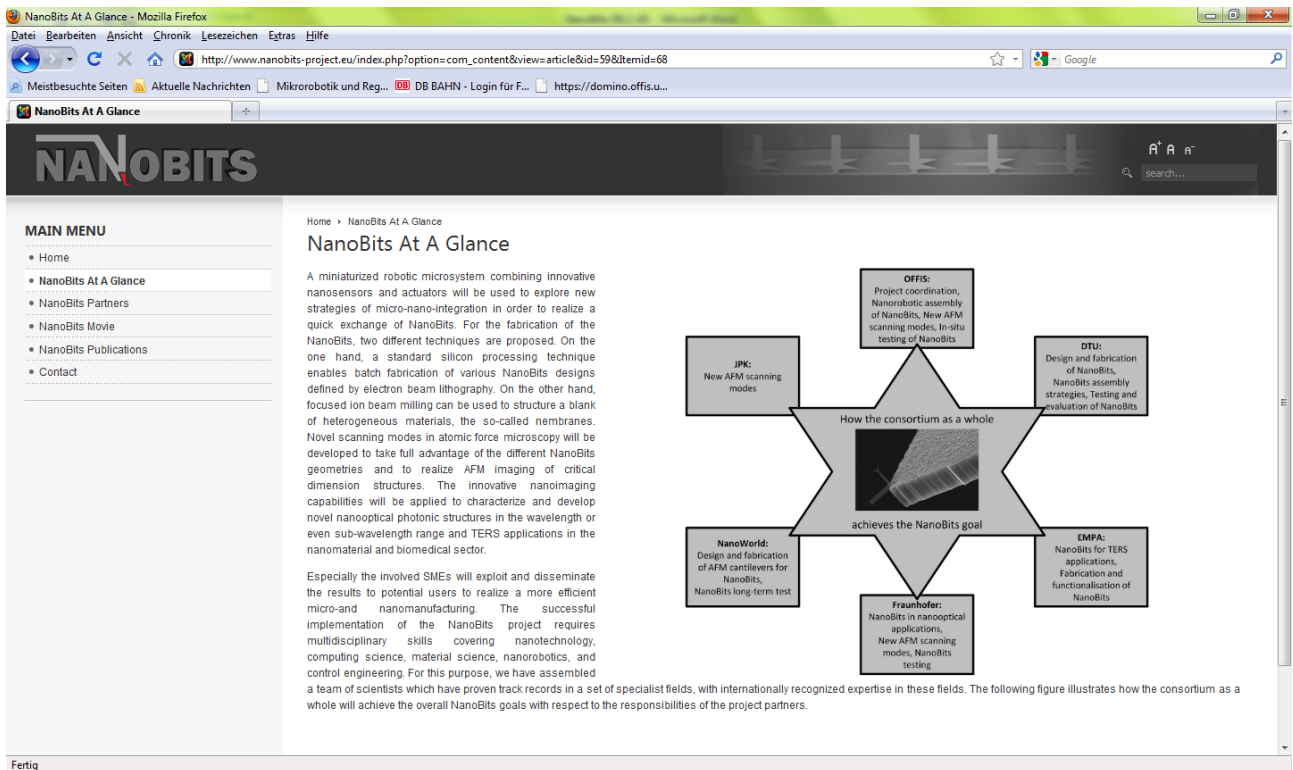

### 2.1 NanoBits public website

**Fig. 1: screenshot NanoBits Homepage**

As shown on the screenshot above, the website [www.nanobits-project.eu](http://www.nanobits-project.eu) presents at first a homepage beginning with the NanoBits logo and a picture of the bits themselves in the headline. Furthermore it contains a main menu with subtitles, a login form for project partners and a project description providing the background and goals of the project. All institute logos as well as the EU logo as the funding partner and the logo of the seventh framework programme are presented on the first page. A calendar for upcoming events, deliverable and milestone deadlines is helpful for the consortium to be reminded of the due dates.

The second subtitle NanoBits at a Glance introduces the participating partners in a star formation. Six rays lead to the consortium partners and demonstrate a short description of their qualities and tasks concerning the project.

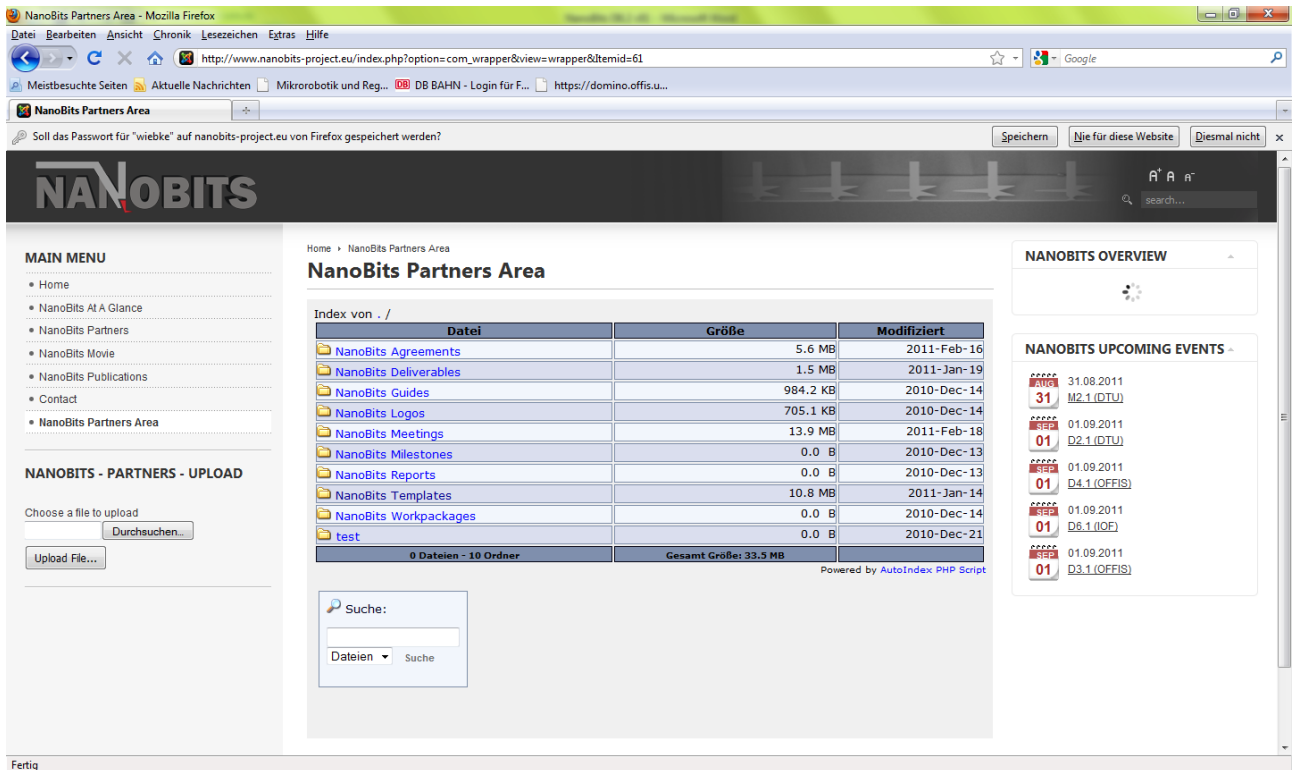

**Fig. 2: screenshot NanoBits At a Glance**

A detailed partner description and a short movie follow on the subtitles below. A possibility for registering adequate journal and conference papers as well as published press releases is given under NanoBits Publications.

The last subtitle is the category Contact where the address of the project coordinator is written to offer a direct contact to the target group.

### 2.2 NanoBits confidential area

**Fig. 3: screenshot NanoBits Partners Area**

After having logged into the partner area, the visitor has access to all relevant documents, agreements and necessary information about meetings and presentation material.

- Agreements
- Deliverables
- Guides
- Logos
- Meetings
- Milestones
- Reports
- Templates
- Workpackages

This category fulfills the function of an archive, a library of specialist information and a platform to exchange documents. The partners can easily upload and download files and collect all contributions to the project.
