Abstract

FIWARE for Industry, initially powered by the FITMAN EU project, is the European community and two-sided digital platform where ICT Industry can locate resources and expertise to develop FIWARE-enabled digital platforms and where Manufacturing Industry can find FIWARE-enabled reference implementations of Industry 4.0 business processes for their competitive advantage. The synergies between LAB-HUB-ACADEMY and SHOWCASE pillars make FIWARE for Industry the digital innovation environment for Industry 4.0 Factories of the Future.
