1   Publishable summary

The LOD Around-The-Clock (LATC) Support Action objective is to help institutions and individuals in publishing and consuming quality Linked Data on the Web.

The main work items and achievements in the second year in order to realise the objectives were:

- o The deployment of an 24/7 Interlinking Platform on a computing cluster including user-facing tools to discover datasets and create linksets as well as a Quality Assurance component and administrative interfaces.
- o The compilation of a library of Linked Data tools along with tutorials and best practices concerning Linked Data publication and consumption including a screen cast that demonstrate the usage of the tools.
- o The publication of datasets of European Institutions as Linked Open Data on the Web, forming the basis of the EU Data Cloud.
- o The development of a sustainability plan to make sure that the results will be available to the community at large.

All project results are publically available via the LATC project website at http://latc-project.eu/
