Table of Contents

Table of Contents	3
1. Introduction.....	4
2. TAS ³ project web site.....	4
3. TAS ³ working space for project partners.....	5
4. Training portal	6
5. TAS ³ community.....	6
6. TAS ³ leaflet and poster	7

1. Introduction

The structure of the communication and dissemination of TAS³ is distributed on 4 different sites, each one addressing a specific target.

Site	Access	Function	Target	Contents
www.tas3.eu	Public	Official project website	All public	Project presentation & contractual deliverables
portal.tas3.eu	Private	Partners' working space	Partners	Work in progress, deliverables
training.tas3.eu	Restricted	Training portal	Project partners and implementers of digital identity	Courses, guidelines,
community.tas3.eu/	Restricted	social network for the associated partners of TAS ³ and the community at large	All the professionals and stakeholders involved in trust and digital identity	Contacts, discussions, special interest groups

2. TAS³ project web site

The TAS3 public web site (www.tas3.eu) contains an introduction to the project's objectives, expected results, a list of TAS3 partners and a news section as well as a blog aggregator. An area of the site explaining how Associate Partners can work with TAS3 will also be implemented shortly and will include the Associate Partners Charter.

TRUSTED ARCHITECTURE FOR SECURELY SHARED SERVICES
What Is TAS³
 TAS³ aims to have a European- wide impact on services based upon personal information, which is typically generated over a human lifetime and therefore is collected & stored at distributed locations and used in a multitude of business processes.
[Learn More →](#)

Goals of TAS³
 The goal of TAS³ is to demonstrate that its architecture can deal with the following challenges in a generic and scalable way.

1. User & Service Provider Authentication & Credential management
2. Establishing Trust between Users, Information Repositories and Service Providers
3. Data Protection Policies
4. Transparency of Business Processes
5. Demonstrator Challenges

5. TAS³ community

The TAS3 partners are currently experimenting the use of a social network (NING) as a space for dissemination. The network is currently restricted, and will be made accessible to the associated partners, the pilot partners and to the larger community of TAS³ adopters.

6. TAS³ leaflet and poster

An initial flyer on the project has been produced and has been distributed during the ePortfolio Maastricht conference.

The image shows a TAS³ leaflet and poster. The top section features the TAS³ logo and the title "TAS³ PARTNERS". Below this is a list of partner institutions, including the University of Leuven, University of Kent, and others. A "CONTACTS" section provides information for Luk Verwee and Danny De Cock. The bottom section, titled "EMPOWERING CITIZENS", discusses the importance of trust in the context of Internet-based transactions and the role of TAS³ in addressing this issue. The poster also includes logos of various partner organizations and a small image of a person's face.

Building a trusting future

Trusted Architecture for Securely Shared Services

This can be stopped!

Trust

August 2010: 2010 Global Security Index (GSI) ranked TAS3 as the most trusted organization in the world among 1000 organizations. TAS3's security reputation is a key factor in its success as a leading provider of secure services.

Trust

2010: TAS3 was named the most trusted organization in the world among 1000 organizations. TAS3's security reputation is a key factor in its success as a leading provider of secure services.

CONTEXT

As increasing number of organizations embrace the cloud, the need for a trusted architecture to support the secure sharing of data and services is becoming increasingly apparent. TAS3 is a leading provider of secure services, and its success is a result of its commitment to security and privacy.

TAS3 OBJECTIVES

The Trusted Architecture for Securely Shared Services (TAS3) is a leading provider of secure services, and its success is a result of its commitment to security and privacy. TAS3's objectives are to provide a secure and trusted environment for the sharing of data and services.
