

**Short relation on the scientific stay at Frascati (9/6/2015-10/6/2015)**

I attended the conference “Constructive renormalization group” at Laboratori Nazionali di Frascati. Constructive renormalization group is one of the main scientific themes of the DMCP Marie Curie Fellowship. I had the chance of discussing with some of the leading experts: notably D. Brydges, T. Spencer, J. Frohlich. Also, during the workshop, I had some time to work with A. Giuliani (one of the local scientists in charge of my training during my Marie Curie fellowship in Roma Tre) and with V. Mastropietro, on the problem of interacting dimers on general bipartite lattices.

Fabio Toninelli  
fellow researcher  
Marie Curie action DMCP

A handwritten signature in black ink, reading "Fabio Toninelli". The signature is written in a cursive style with a large, stylized 'F' and 'T'.
