

Short relation on the scientific stay at Oxford (20/9/14-3/10/14)

I was invited to the conference “Advances in probability: universality, integrability and beyond”, held at University of Oxford (UK). There, I gave an invited lecture on “Height fluctuations in interacting dimers”; this was based on results that I have obtained in collaboration with A. Giuliani (one of the local scientists in charge of my training during my Marie Curie fellowship in Roma Tre) and with V. Mastropietro. Also, during the stay I worked with B. Laslier and with A. Borodin on problems of dynamics of dimer models.
