First International Workshop on Automated Configuration and Tailoring of Applications, Antwerp, Belgium

**From** 2010-09-20 to 2010-09-20, Belgium

The First International Workshop on Automated Configuration and Tailoring of Applications will be held on 20 September 2010 in Antwerp, Belgium.

With the increasing number of applications and the importance of software in our daily lives, it is inevitable that in the near future end-users will be directly involved in configuring and tailoring applications to match their requirements. Major attention will have to be paid to automation of software configuration approaches and tailoring of applications. Additionally, software product lines will need to be deployed in a fundamentally different, more compositional, way and prepared as the basis for a software ecosystem.

The goal of this workshop is to explore the current status and ongoing work within the field of variability management and software configuration by bringing together experts from different areas and promoting the transfer of knowledge between different disciplines and application domains.

The workshop also aims to bring together researchers and practitioners from industry to discuss practical problems and potential solutions.
