Fourth International Conference on Pervasive and Embedded Computing and Communication Systems, Lisbon, Portugal

From 2014-01-07 to 2014-01-07, Portugal

The Fourth International Conference on Pervasive and Embedded Computing and Communication Systems (PECCS 2014) will be held from 7 to 9 January 2014 in Lisbon, Portugal.

Pervasive and embedded computing and communication systems are models that aim to provide secure and reliable services in the field of ICT. To obtain this, the systems incorporate a combination of hardware technologies in tandem with wireless networks.

Now in its fourth year, this conference aims to present a comprehensive overview of ICT systems. It will feature integrated communications models, nanotechnologies and signal processing designs.

The event will bring together researchers, engineers and practitioners interested in the theory and application of intelligent computing solutions.
