Synopsis of fisheries and aquaculture projects under Third Framework Programme

A synopsis of selected projects in the field of fisheries and aquaculture has been published by DG XII of the European Commission. The projects were funded by the Community's specific RTD programme in the field of agriculture and agro-industry, including fisheries (AIR), under...

A synopsis of selected projects in the field of fisheries and aquaculture has been published by DG XII of the European Commission. The projects were funded by the Community's specific RTD programme in the field of agriculture and agro-industry, including fisheries (AIR), under the Third Framework Programme (1991-1994).

The publication focuses specifically on 74 "fisheries and aquaculture" projects of the AIR programme, broken down as follows: aquaculture (34 projects), fisheries management and fishing technology (30 projects), and upgrading of fishery products (10 projects).

For each project, the publication provides a description of its objectives, type of proposal and duration, and contact details for the project coordinator, Commission official responsible and participants.
