

Project: REViSITE Roadmap Enabling Vision and Strategy for ICT-enabled Energy Efficiency www.revisite.eu	
Title: REViSITE Consolidated Community Report	Deliverable D1.1b (download)
Work Plan: The REViSITE project aims at producing a common cross-sectoral ICT4EE roadmap: <u>this result is not achievable in a complete form by the consortium alone.</u> REViSITE needs the input of external experts such as ICT players, industries, researchers, (all together: stakeholders) working with selected RTD priorities. The following document aims to summarise the work achieved in the Task T1.1: RTD & Funding Communities Consolidation Executive summary: This document relates to the work done in setting up and maintaining this community. Our approach started with the exploration of the ETPs behind the four targeted domains. The different chapters are corresponding to the following steps: (i)identification of key stakeholders within these ETPs; (ii)identification of relevant stakeholders at a European and National level; (iii)identification of relevant standardisation initiatives and bodies; (iiii) definition of the communication strategy towards this community and community profile. The community has been built all along the project duration on a desk based study but also with experts invited to events. At the end of the project, the community counts more than 100 persons. As mentioned in our communication procedure, REViSITE will not publish any nominative and personal data. As the status of this deliverable is Public. All names, emails and phone numbers have been removed from the final public version of the document.	Authors:  Bruno Fiès (CSTB) bruno.fies@cstb.fr
