

# ENIGMA

ENLIGHTENMENT AND INNOVATION, ENSURED THROUGH PRE-COMMERCIAL PROCUREMENT IN CITIES

## Report on PCP knowledge base

*Deliverable 2.1*

Public report  
Author: Hendrik van Meerveld & Joram Nauta  
March 2014

**ENLIGHTENMENT AND INNOVATION, ENSURED THROUGH PRE-COMMERCIAL PROCUREMENT IN CITIES**

## About ENIGMA

---

The goal of the European-funded ENIGMA project is to bring radical improvements to the quality and efficiency of public services by supporting the development and validation of breakthrough solutions in the field of public lighting through a joint Pre-Commercial Procurement (PCP). The partners also aim to demonstrate how PCP can be used in a transnational context to tackle common city challenges across the EU and improve the quality of life of their citizens.

### PCP

---

Pre-Commercial Procurement (hereafter PCP) essentially refers to the purchase of research and development (R&D) services by the public sector. It is triggered by procurers identifying the need to solve a socio-economic problem or challenge of public interest for which there is no solution available on the market yet. Accordingly, PCP is not concerned with the procurement of existing products or services on the market but with the R&D phase, which involves solution exploration and design, prototyping, up to the original development of a limited volume of first products or services.

The PCP instrument enables the commissioning of R&D services, under a staged competitive process, to allow the development of innovative solutions that meet the needs of a Contracting Authority. This approach is based on:

- Risk-benefit sharing according to market conditions;
- Competitive development in phases; and
- Separation of the R&D phase from deployment of commercial volumes of end products.

PCP has received much attention, particularly by policy makers as a tool to promote innovation. But from the perspective from practical implementation, there is still a lack of knowledge<sup>1</sup> and 'know-how'. Furthermore, the degree of understanding and experience on PCP still varies a lot across Europe<sup>2</sup>.

This however, does not mean nothing is being done in regard to PCP. Over the past few years, PCP related initiatives have emerged in a number of countries around Europe. This has been made visible in the figure below which is shown on the Cordis website: [PCP related initiatives](#).

In response to the positive reactions from the EU Council and Parliament on PCP, the Commission started in 2009 to support the establishment of networks of public procurers on PCP to promote awareness-raising and experience-sharing on PCP, as well as encourage cooperation among public

---

<sup>1</sup> In part, this is indicated by a limited amount of documented cases, at least in scientific literature. Although the role of procurement in innovation has received much attention, PCP in particular are not extensively documented in scientific literature.

<sup>2</sup> European Commission (2011), Compilation of results of the EC survey on the status of implementation of pre-commercial procurement across Europe.

procurers from different Member States in specific public sector domains that could lead to jointly implemented pre-commercial procurements. In 2011, the Commission opened also the first calls for proposals to co-finance consortia of public procurers that want to go one step further and really undertake a PCP together on a topic that is of interest to public procurers from a number of countries across Europe. Such projects, that receive EC co-financing for undertaking a joint cross-border PCP procurement, started beginning 2012. Examples of both type of projects can be found through this [link](#).

FIGURE 1: OVERVIEW OF INITIATIVES REGARDING PCP IN EUROPE

Many of the initiatives involve knowledge share and/or are aiming at dissemination the knowledge gained.

### [About this report](#)

This report is the result of the task aimed at acquiring a PCP Knowledge base by bringing together knowledge, experiences and other (practical) contributions from within the ENIGMA-consortium and outside.

Other projects and initiatives have resulted in PCP (or PCP related) processes have been designed for public procurement of innovations that ENIGMA can build on. Bringing together and using not only their templates, but also their experiences will allow ENIGMA to compile and present in a report the best of the available knowledge and experience to this consortium and can be used to design and execute the ENIGMA PCP.

The application of this generic PCP process task will gather all the existing experience and knowledge of PCP from both within the partners and from other sources and use this to synthesize a process suitable for use across European national boundaries. The results will be shared with all partners.

### **Approach and structure of report**

The approach taken in this task followed three steps. The result are reported in a similar structure.

1. Inventory of knowledge base. This included searching for experiences and other (practical) contributions from within the ENIGMA-consortium and outside the consortium. These are summarized in chapter 1 of this report.
2. Labelling and selecting experiences and contributions. In a quick scan, the contributions were analyzed for its content and manner in which they can contribute to the design and

**ENLIGHTENMENT AND INNOVATION, ENSURED THROUGH PRE-COMMERCIAL PROCUREMENT IN CITIES**

execution the ENIGMA PCP or other future (trans-national) PCP's. This is summarized in chapter 2.

3. Synthesizing the results. This included mapping the selected contributions. This is summarized in chapter 3.

Chapter 4 covers the conclusions and provides an outlook to other steps taken in the ENIGMA project.

## 1 INVENTORY OF KNOWLEDGE BASE

### 1.1 PCP RELATED PROJECTS AND INITIATIVES IN EUROPE

#### Projects undertaking cross-border joint PCPs

<a href="#">CHARM</a>	Common Highways Agency Rijkswaterstaat Model
<a href="#">SMART@FIRE</a>	Integrated ICT solutions for smart personal protective equipment for fire fighters and first responders
<a href="#">V-CON</a>	Virtual Construction for Roads
<a href="#">SILVER</a>	Supporting Independent Living for the Elderly through Robotics
<a href="#">DECIPHER</a>	Distributed European Community Individual Patient Healthcare Electronic Record
<a href="#">PRACE 3IP</a>	Partnership for advanced computing in Europe 3rd implementation phase
<a href="#">C4E</a>	Cloudforeurope
<a href="#">IMAILLÉ</a>	Focus: E-learning
<a href="#">THALEA</a>	Focus: highly interoperable telemedicine-platform developed for detection of ICU-patients at increased risk
<a href="#">NYMPHA-MD</a>	
<a href="#">UNWIRED-HEALTH</a>	
<a href="#">PREFORMA</a>	

#### Projects focusing on Networking / Awareness Raising related to PCP and PPI

<a href="#">INSPIRE</a>	
<a href="#">PAITS</a>	
<a href="#">RAPIDE</a>	Bringing innovative products and services to the market more quickly
<a href="#">P3ITS</a>	Intelligent transport domain
<a href="#">PROGR EAST</a>	government application domains for PCP

### 1.2 From the ENIGMA consortium partners

Consortium partners have— among others—been involved in the following PCP (related) projects.

Projects focusing on Networking / Awareness Raising related to PCP and PPI	
• <a href="#">BLISS</a>	• <a href="#">CHARM</a>
• <a href="#">SPEA</a>	• <a href="#">SILVER</a>
• <a href="#">PROGR-EAST</a>	• <a href="#">V-CON</a>
• <a href="#">LCB-HEALTHCARE</a>	• <a href="#">SBIR</a>

ENLIGHTENMENT AND INNOVATION, ENSURED THROUGH PRE-COMMERCIAL PROCUREMENT IN CITIES

- Procurement forum ([link](#))
- PCP projects on cordis website ([link](#))
- PCP initiatives ([link](#))

## 2 Labelling and selecting experiences and contributions

### 1.1 Guides

Several projects have resulted in guides for executing a PCP.

Document	Comments
Pre-Commercial Procurement: Driving Innovation to ensure high quality public services in Europe. <a href="#">3</a> ( <a href="#">link</a> )	This document concerns a communication from the commission to the European parliament, the council, the European economic and social committee and the committee of the regions. It provides a description of PCP, and discusses various rules and conditions that apply.
A practical guide to PCP <sup>4</sup> ( <a href="#">link</a> )	This guide is the result of the PROGR-EAST project and describes the various (preparatory) steps taken in a PCP.
Pre-Commercial Procurement for Intelligent Transport Systems A Guide for PCP Actors <sup>5</sup> ( <a href="#">link</a> )	This document is the result of the P3ITS project. Although the project focused on intelligent transport systems, the guide produced is generally applicable.
Forward Commitment Procurement ( <a href="#">link</a> )	Although not designed for PCP's, the FCP method has been applied in a number of (pilot) projects aiming at procuring innovation (e.g. PPI projects). The results of those projects are promising. There is special emphasis on the way the contracting authorities comes to an optimal procurement strategy which includes the identification of needs and market engagement.

### 1.2 Templates/documents

Various templates and tools have been made available through other projects.

Project	Comments
PROGR-EAST ( <a href="#">link</a> )	various templates including those for developing business cases for authorities.
<a href="#">SILVER</a> (still to be officially published)	various templates used through the PCP process (notifications, specifications, etc.).
<a href="#">CHARM</a> ( <a href="#">link</a> )	various templates or example documents used through the PCP process. (notifications, specifications, etc.).
LCB-HEALTHCARE / ECO-QUIP ( <a href="#">link</a> )	Examples of document that were used in the LCB-HEALTHCARE project, particularly for engaging with potential suppliers. (NOTE: not all are publically available)

### 1.3 Workshop materials

Several training sessions have been organized. Material and presentations have been made available through the ENIMA website ([link](#)).

<sup>3</sup> <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2007:0799:FIN:EN:PDF>

<sup>4</sup> <http://www.progreast.eu/files/PCP%20GUIDE.pdf>

<sup>5</sup> [http://ec.europa.eu/information\\_society/activities/esafety/doc/rtd\\_projects/fp7/p3its\\_handbook.pdf](http://ec.europa.eu/information_society/activities/esafety/doc/rtd_projects/fp7/p3its_handbook.pdf)

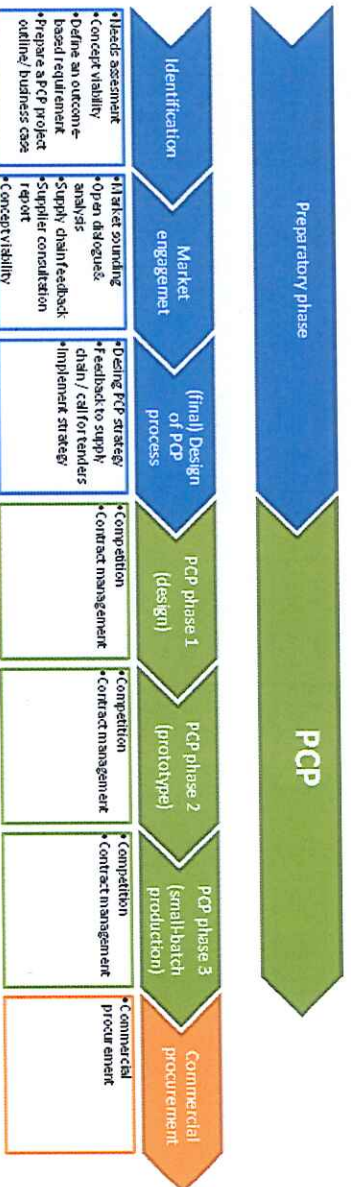

## 2 Synthesizing results - integration of knowledge base

### 2.1 First steps in developing a generic PCP process

Below, an overview is presented in that incorporates the process overviews from the PROG-EAST PCP-guide and experiences from the LCB-HEALTHCARE project<sup>6</sup>.

The picture emphasized the importance of preparation. A well prepared process is vital to success, and includes various steps. Furthermore, the preparatory phase is a phase in which the contracting authority/authorities are in close contact to potentials suppliers.

### 2.2 Integrating knowledge in the generic process

#### Identification

- Decision model on starting PCP (PROG-EAST, European Commission guide)
- Business case development (PROG-EAST, LCB-HEALTHCARE)

#### Market consultation

- PIN format (LCB-HEALTHCARE, SILVER)
- Consultation documents (LCB-HEALTHCARE, CHARM, SILVER)

#### Design of PCP process/implementation

- Proces format/examples (SILVER, SBIR)
- Contract format (SILVER, PROG-EAST)

<sup>6</sup> FCP was conceived and the methodology first developed by the Environmental Innovations Advisory Group (EiAG) established by Lord Sainsbury, then UK Minister for Science and Innovation, in 2003 (DTI, 2006) under the chairmanship of Dr J. C. Frost (OBE). The FCP methodology was further developed by the UK Department for Business Innovation & Skills (BIS), and in 2009 FCP was adopted in 2009 as the methodology for delivery of innovation procurement in pilot projects within the LCB-Healthcare Project.

### 3 Conclusions and future steps

- Although PCP has received much attention in the last couple of years, there is still a lack of knowledge and know-how on implementing PCP.
- Much knowledge is present within and outside the ENIGMA consortium.
- Integrating knowledge offers good opportunities in developing a suitable PCP process for ENIGMA and a generic process in designing/executing (transnational) PCP's.
- First steps have been taken and are documented in this report. Material has been made available through the (internal) [ENIGMA website](#).
- Next steps of WP2 of ENIGMA aim at further developing an generic PCP process and PCP tools.
