

SEVENTH FRAMEWORK PROGRAMME
Challenge 1
Information and Communication Technologies

Trusted Architecture for Securely Shared Services

Document Type: Deliverable

Title: Publications, scientific communications in peer reviewed journals, policy papers (green and white papers)

Work Package: WP11

Deliverable Nr: D11.4

Dissemination: All

Preparation Date: 31 December 2010

Version: 3.0

9 POLICY AND WHITE PAPERS.....	12
10 ROADMAP AND CONCLUSIONS	12

1 Executive Summary

The goal of this document is to detail the TAS³ publications, the scientific communications in peer reviewed journal, policy papers and dissemination towards standardization bodies.

During the three first years, the project has produced more than 50 scientific publications in the field of trust and digital identity, which is already beyond the initial objectives of the project. The first policy papers have been published, and they will be used as a foundation for the continuation of the project beyond its financing.

2 Introduction

The purpose of this document is to list the publications related to scientific journals, books and conferences. For practical reason, it will also list the public interventions at meetings and conferences.

The IEEE standard of referencing will be followed to ensure consistency and compliancy to scientific convention. Then, the publications are classified according to the following groups: periodicals, books, published conferences proceedings, papers presented at conferences, theses and dissertations, standards, and policy and white papers.

(See http://www.ieee.org/portal/cms_docs_iportals/iportals/publications/authors/transjnl/stylemanual.pdf) .

10 Roadmap and conclusions

Future updates of this document are planned for M48. Until then, the roadmap for updating the document is a specific section on the Wiki called “publications” where each partner can update their publications as required following the IEEE style. This will ensure that the most up-to-date list of TAS³ publications is maintained at all times.
