Subject: Result of the review of the SCENIC project - 222079

Dear Prof. Augusto Sarti,

Following the review of your project held in Trento on 16 of March 2011 and based on the attached Review report of the experts, the Commission has decided according to the provisions of Article II.23 of the grant agreement to allow the project to continue taking into account the recommendations detailed in the enclosed Review report (Annex 2).

The review report acknowledges the very high quality of the scientific work performed in the second year. In its recommendations, it highlights the need in the third year to strengthen the dissemination effort and to focus more on some convincing illustration of the overall concept of the project, i.e. showing how the inferred information about the acoustic response of the environment is actually turned from a liability into an asset and of the potential innovative applications that could be derived from such an approach.

The deliverables submitted were considered of very good quality and were all accepted. The Commission approval of deliverables is set out in the enclosed Annex 1.

The detailed result of the experts' review of the project is set out in the enclosed Review report (Annex 2).

According to Article II.23.8 of the grant agreement, you may make observations on the result of the review of your project within one month of reception of this letter.

I wish the best to you and to the project team for the coming period and I look forward to see the progress of the project.

Please acknowledge receipt of this letter and inform your partners of its content.

Yours sincerely,

Aymard de Touzalin
Project Officer
