1 Introduction

SSPNet deliverable D3.5 is the third version of the network portal (available at <http://www.sspnet.eu>). The portal includes four major sections:

- *Publications.* This section includes the publications of the SSPNet.
- *Resources.* This section includes the three repositories of the SSPNet, namely data (annotated corpora), tools (software packages) and bibliography (references).
- *Virtual Learning Centre.* This section includes the presentation recordings collected during the events organized by the SSPNet.
- *About.* This section includes an introduction to Social Signal Processing.

The portal has reached a stable configuration both content-wise and layout-wise. No major modifications are planned.
