Opening European Chinese Cooperation in ICT Research
OpenChina-ICT is a project supported by the European Commission through its FP7 research funding programme, aims at significantly and measurably contributing to the facilitation of ICT related research cooperation between Europe and China.
Achieving this overall objective will be supported by the drafting of a EU-China ICT Cooperation Plan detailing current and emerging priorities for international cooperation and advising both the European Commission and the Chinese Government on how to design effective and mutually beneficial international research cooperation programs.
More precisely, the OpenChina-ICT project will
Interview experts to identify current and emerging research topics and priorities between Europe and China
Conduct country specific surveys on ICT research environment
Organize one major dialogue conference in Beijing, two thematic workshops in China and a final conference in Brussels.
Develop and maintain a web portal and promotional materials to communicate on the project's goals, objectives and results

a. March 2012 newsletter

OpenChina-ICT

March 2012

Dear colleague

Welcome to the first edition of the OpenChina-ICT project newsletter!

You are receiving this newsletter because you either subscribed for it on the OpenChina-ICT website or were previously involved in research collaboration activities between Europe and China.

The OpenChina-ICT project, supported by the European Commission through its FP7 research funding programme, aims at significantly contributing to the facilitation of ICT related research cooperation between Europe and China. It started in January 2012 and will develop its activities over a two year period.

The partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

Join us on LinkedIn!

The OpenChina-ICT initiative is happy to announce the launch of a Euro-China LinkedIn group devoted to ICT research cooperation.

The vision of this group is to connect all European and Chinese research communities, so that potential cooperation projects between the two regions in ICT research can be more efficiently discussed, shaped and eventually jointly developed (in sub-groups of the network), in particular thanks to existing interconnected eInfrastructures (ORIENT and TEIN).

"The OpenChina-ICT LinkedIn group" is opened to any interested ICT stakeholders: companies, academia and research institutes from the two regions active or interested in cooperation in ICT research and who want to take advantage of two free of charge facilities in the development of envisioned or existing cooperation projects.

Join us here!

b. June 2012 newsletter

June 2012

Dear Stephanie Morales,

The OpenChina-ICT partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

Upcoming OpenChina-ICT event

This event will be the first in a series of four cooperation events that the OpenChina-ICT project has planned to organise until the end of 2013, in China and in Europe in order to raise awareness and promote cooperation opportunities between the two regions, provide interested organisations with an opportunity to meet and strengthen their links, and collect inputs useful to the preparation of a "EU-China ICT Cooperation Plan".

Join the OpenChina-ICT LinkedIn community !

As of today, the OpenChina-ICT LinkedIn community has been increasing and now displays more than 100 members interested in EU-China cooperation.

If you are pursuing international cooperation activities in ICT field, take advantage of opportunities the OpenChina-ICT LinkedIn community offers you:

- Getting knowledge on the FP7 Programme and funding opportunities
- Being updated on time on the activities developed by the OpenChina-ICT partnership
- Promoting your project/initiative to the European and Chinese ICT research community
- Participating in interesting discussions on current ICT topics
- Looking for a potential partner in Europe and in China

The OpenChina-ICT Advisory Board revealed

The OpenChina-ICT partnership is pleased to announce today the final composition of its Advisory Board.

The newly Advisory Board has been created in order that OpenChina-ICT activities can take advantage of the experience of key organisations and experts from Europe and China involved in cooperation in ICT research between the two regions, and can also be of the greatest benefit to them.

This Board is composed of representatives from 20 leading constituencies, companies, research institutes and academia, including the main EU-Chinese experts in the ICT area, and from key European initiatives in China. The members of the OpenChina-ICT Project Advisory Board are invited to contribute to OpenChina-ICT activities, particularly regarding the facilitation of international (policy) dialogue and the enhancement of EU-Chinese cooperation in ICT research. It is also expected that useful synergies between OpenChina-ICT activities and the ones developed by the organisations represented in the Board will develop.

For complementary information on the members and organisations of the Advisory Board, please visit the dedicated page on our website here.

Upcoming events (April - June 2012)

The first OpenChina-ICT Dialogue Conference to be held in Beijing on November 15-16, 2012
The OpenChina-ICT 2-days Dialogue Conference will be held on November 15-16, 2012 in Beijing, P.R. China. The objective of this event is to focus on the identified top Chinese ICT research priorities and on the development of concrete recommendations for action for international cooperation in ICT. More

IEEE will organise in 2012 a series of ICT conferences in China
IEEE, pronounced "Eye-triple-E", stands for the Institute of Electrical and Electronics Engineers. It is a professional association dedicated to advancing technological innovation and excellence. IEEE and its members inspire a global community through IEEE's highly cited publications, conferences, technology standards, and professional and educational activities. More

7th International Conference on Communications and Networking in China
The 7th International Conference on "Shaping tomorrow with communications and networking technologies" will take place on August 8-10, 2012 at Dianchi Garden Hotel & Spa in Kunming, China. It is organised by the European Alliance for Innovation, a leading community-based organisation devoted to the advancement of innovation in the field of ICT. More

Promoting Sino-European cooperation on Graphene and Organic Nano-Electronics for the ICT Sector

Opening European Chinese Cooperation on ICT Research

September 2012

Dear Stephanie Morales,

The OpenChina-ICT partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

The OpenChina-ICT Dialogue Conference

The OpenChina-ICT 2-days Dialogue Conference will be held at Wenjin Hotel on November 15-16, 2012 in Beijing, P.R. China, with the support of the European Commission.

This event (free of charge) will focus on the identified top Chinese ICT research priorities and, in particular, on the development of concrete recommendations for actions for international cooperation in ICT between Europe and China.

The objectives of this event are:

- To foster an active dialogue on the identified top ICT research priorities and especially on international cooperation between relevant stakeholders (researchers, politicians, industry representatives, etc.).
- To discuss specific cooperation opportunities, programmes and initiatives.
- To strengthen the EU-China policy dialogue.
- To develop concrete recommendations for actions for international cooperation in ICT between Europe and China.

The online agenda **has been recently updated** with high-level speakers from Europe and China, including representatives from the European Commission DG CNECT, government officials, key research experts, C-level executives and many other speakers.

December 2012

Dear Stephanie Morales,

The OpenChina-ICT partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

Successful outcomes of the OpenChina-ICT Dialogue Conference

The OpenChina-ICT Dialogue Conference has been successfully held on November 15 and 16, 2012 in Beijing, P.R. China, with the support the European Commission. The event aimed at developing concrete recommendations for actions for international cooperation in ICT between Europe and China.

Over 240 delegates have attended this event and contributed to a thorough exchange of information and experience between stakeholders from Europe and China involved in activities aiming at facilitating ICT related research cooperation between both regions.

Event highlights:

- High-level representatives from EU and China, in particular: MOST, MIIT, NDRC, the Delegation of the European Union to China and representatives from the European Commission,
- Lab visits of China Academy of Telecommunication Research (CATR) laboratory and Huawei showroom,
- Matchmaking session welcoming 12 European organisations and 42 Chinese organisations,
- Signing of 46 MOU agreements between EU and Chinese organisations as a strong willingness to network and collaborate in the future.

The event proceedings are now available online: Agenda | Event report | Photo gallery | Video gallery

OpenChina-ICT

Opening European Chinese Cooperation on ICT Research

March 2013

Dear Stephanie Morales,

The OpenChina-ICT partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

Upcoming event - 1st OpenChina-ICT Thematic Workshop on Smart and Sustainable Cities - May 31, 2013 - Foshan, P.R. China

Event concept

The concept of this workshop is to organise a forum bringing together policy and main research stakeholders from Europe and China specialized in the Smart and Sustainable Cities topic and to create feasible research collaboration with the emergence of concrete projects. An audience of 50 to 70 participants is targeted.

The workshop will include a plenary session to give an overview of the status and perspectives of Smat and Sustainable Cities research collaboration in ICT between Europe and China, and parallel thematic sessions during which working groups will strive to thoroughly discuss sub-themes and identify short-term cooperation projects. The outcomes will be used to produce the "EU-China Cooperation Plan" presenting the potential for collaboration in ICT research between Europe and China, including a set of recommendations to policy makers on how to better foster collaboration in the future.

Event objectives

- To assess the perspectives of ICT research collaboration on Smart and Sustainable Cities between Europe and China,
- To discuss sub-themes and identify short-term cooperation projects,
- To gather inputs for the OpenChina-ICT "EU-China Cooperation Plan", presenting the ICT research and cooperation priorities,
- To provide a set of recommendations to policy makers on how to better foster EU-China collaboration in the future.

f. June 2013 newsletter

6th Edition

Dear Stephanie Morales,

The OpenChina-ICT partnership is very pleased to bring to your attention a number of recent developments in the field of EU-China Cooperation on ICT research.

Upcoming event - 2nd OpenChina-ICT Thematic Workshop - August 23, 2013 - Beijing, P.R. China

Event concept

The concept of this workshop is to organise a forum bringing together policy and main research stakeholders from Europe and China specialized on the ICT aspects of Internet of Things and the Future Internet and to create feasible research collaboration with the emergence of concrete projects. The outcomes will be used to produce the "EU-China ICT Cooperation Plan" presenting the potential for collaboration in ICT research between Europe and China, including a set of recommendations to policy makers on how to better foster collaboration in the future.

The workshop includes a plenary session, giving an overview of the status and perspectives of ICT research collaboration between Europe and China and parallel thematic sessions during which working groups will strive to thoroughly discuss sub-themes and identify possible cooperation projects.

The 2nd OpenChina-ICT Thematic Workshop will be organised as a side event of iThings2013 (International Conference on Internet of Things) organised by IEEE from August 20-23.

Event objectives

- To bring together policy and main research stakeholders from Europe and China specialized in the fields,
- To foster research collaboration between the two regions with the emergence of concrete projects,
- To produce outputs on the current and emerging priorities for EU-China cooperation,
- To provide recommendations to policy makers on EU-China collaboration opportunities in the future.

Access the event agenda here I Register here

Project highlight - Final OpenChina-ICT Conference - November 5, 2013 - Vilnius, Lithuania

The OpenChina-ICT Final Conference is taking place at a crucial time for the development of new instruments for EU-China cooperation including collaboration in science, technology and innovation (through the launch of the new EU Horizon 2020 Framework Programme for Research and Innovation).This conference is hence strategically held as a side event of ICT2013 organised by European Commission's DG CONNECT and representing Europe's most visible forum for ICT research and innovation, taking place from November 6-8, 2013 in Vilnius, Lithuania.

The Final Conference tentative agenda is already available online here featuring, in particular, the participation of Chinese and European experts from EU-China initiatives and labs, expert groups along with officials from the Chinese Government and the European Commission..

Registration is free of charge but compulsory due to room capacity constraints, click here to register.

Newsroom (April - June 2013)

ICT 2013 – Conference programme announced – Have a look!

Opening European Chinese Cooperation in ICT

OpenChina-ICT

Opening European Chinese Cooperation in ICT Research

OpenChina-ICT is a project supported by the European Commission through its FP7 research funding programme, aiming at significantly and measurably contributing to the facilitation of ICT related research cooperation between Europe and China.

Achieving this overall objective will be supported through drafting a concrete EU-China ICT Cooperation Plan detailing current and emerging priorities for international cooperation and advising both the European Commission and the Chinese Government on how to design effective and mutually beneficial international research cooperation programmes.

The consortium is coordinated by Fraunhofer (Germany) and includes Sigma Orionis(France), Beijing Software Enterprise Advisory Center (China), China Academy of Telecommunication Research (China) and China Science and Technology Exchange Center /Ministry of Science and Technology (China).

www.openchina-ict.eu

Project Objectives
Significantly and measurably contributing to the facilitation of ICT related research cooperation between Europe and China.
Drafting a EU-China ICT Cooperation Plan detailing current and emerging priorities for international cooperation and advising both the European Commission and the Chinese Government on how to design effective and mutually beneficial international research cooperation programs.
Key Project Activities
Interview experts to identify current and emerging research topics and priorities between Europe and China.
Conduct country specific surveys on ICT research environment.
Organize one major dialogue conference in Beijing, two thematic workshops in China and a final conference in Brussels.
Develop and maintain a web portal and promotional materials to communicate on the project's goals, objectives and results.
www.openchina-ict.eu

The OpenChina-ICT Beijing Conference is a learning and networking event designed to promote EU-China ICT Research activities and encourage participation and cooperation between China and European research communities.

Day I: November 15th, 2012
Plenary Session with Two Subject Tracks for Attendees

- EU-China ICT Cooperation Research Priorities

  Key researchers from EU and China specialized in the topics of IPv6/Future Internet, Internet of Things, Cloud Computing, Smart Cities, ICT regulatory, will elaborate on the current ICT relevant cooperation priorities.

- High-level Dialogue Meeting

  During the High-level Dialogue meeting, the participants from both EU and China key government policy maker, key researcher and C level executives of ICT companies will discuss the potential international cooperation between Europe and China, as well as the current and emerging priorities for international cooperation.

Day II: November 16th ,2012
One-on-one Matchmaking and Networking Opportunities

- One-on-one Business Matchmaking

  During an exclusive one-on-one occasion, each European participant will have face-to-face business talks with a pool of potential Chinese partners who are carefully selected according to the requirements or Expressions of Interest of European participants. This customized matchmaking session will provide opportunities for European participants and pre-selected potential Chinese partners to exchange their ideas and start discussing details of future collaboration.

- Networking Opportunities

  The OpenChinaICT organizers understand that the networking activities are a very important interaction between participants and sharing ideas and experiences. Therefore, the working lunch and a gala dinner will be organized during the conference.

a. Agenda

OPENCHINA-ICT FINAL CONFERENCE

OpenChina-ICT

OpenChina-ICT Final Conference

Strengthening Cooperation in ICT Research between Europe and China

November 5, 2013
Radisson Blu Lietuva Hotel - Vilnius, Lithuania

TENTATIVE AGENDA

8:30 Welcome of participants

9:00 Opening Session
Chaired by Camille Torrenti - Project Director, Sigma Orionis

Opening address
Ardiel Cabrera - Project Officer, International Relations Unit, DG CONNECT, European Commission

Congratulatory addresses
Jijun Xing - Deputy Director-General of CSTEC/MOST
Cao Jiguang - Deputy Director, Communications Standards Research Institute, CATR/MIIT

Perspectives for cooperation on ICT research under Horizon 2020
Morten Møller - Head of Unit, Unit F3, Programme Coordination, DG CONNECT, European Commission

Bridging EU China R&D cooperation
David Soldani - Vice President of Huawei European Research Center

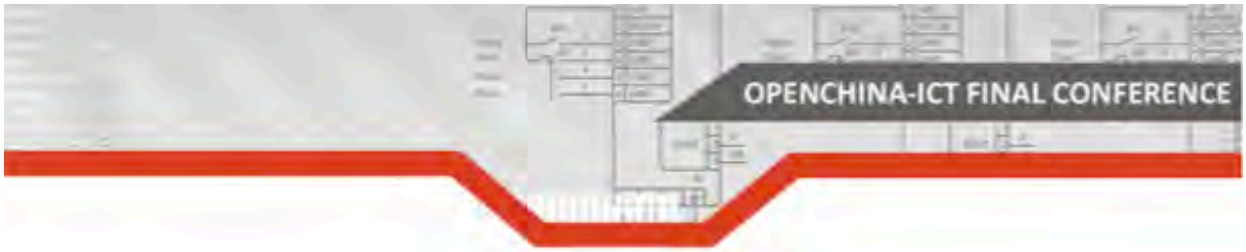
10:30 Coffee break

11:00 Cooperation status and perspectives
Moderated by Ardiel Cabrera - Project Officer, International Relations Unit, DG CONNECT, European Commission

OpenChina-ICT Project
Kay Matzner - OpenChina-ICT Project Coordinator, Fraunhofer

CHOICE Project
Thomas Owens - CHOICE Project Coordinator, Brunel University

Organised by the OpenChina-ICT FP7 project under the aegis of the European Commission and supported by MOST and MIIT



Perspectives for cooperation in the field of Internet of Things
Peter Fries - Project Officer, Network Technologies Unit, DG CONNECT, European Commission

The ORIENTplus project: Linking European and Chinese Research Infrastructures and Communities
David West - Coordinator of the ORIENTplus project, DANTE (TBC)

Other initiatives to foster S&T cooperation between Europe and China
Epaminondas Christofilopoulos - DRAGON-STAR Project Coordinator
Surbhi Sharma - Representative, Ideal-IST
Sara Medina - STI China project, Sociedade Portuguesa de Inovação (SPI)

Q&A session

12:30 Lunch break

14:00 Cooperation priorities in ICT research
Moderated by Thomas Owens - CHOICE Project Coordinator, Brunel University

OpenChina-ICT Cooperation Priorities
Cao Jiguang - Deputy Director, Communications Standards Research Institute, CATR/MIIT
Kay Matzner - OpenChina-ICT Project Coordinator, Fraunhofer

Inputs from the EU-China Expert Groups
Philippe Cousin - Expert of the EU-China IoT Advisory Group, EU-China ECIAO project, FP7 FI-STAR
Shaun Topham - Senior Advisor, EU-China Green Smart City Cooperation Technical Expert Group / Director, eForum

Bilateral initiatives
Yide Wang - Professor of SFC/RIC (Sino-French Research Center in Information and Communication), Polytech' Nantes
Chantal Khan-Malek - Vice-Director, DERCI (International cooperation office), CNRS
Jani Kaarlejärvi - China-Finland ICT Alliance, DIGILE
Chinese-Lithuanian IT Innovation Centre based in Vilnius (TBC)

Q&A session

15:30 Coffee break

Organised by the OpenChina-ICT FP7 project under the aegis of the European Commission and supported by MOST and MIIT

OPENCHINA-ICT FINAL CONFERENCE
16:00 How to move forward?
Moderated by Epaminondas Christofilopoulos - Head of International Cooperation Unit, PRAXI
Panel discussion
Jani Kaarlejärvi - Director, International Coordination, TIVIT
Leon Liu - Project Manager, EU Project Innovation Centre (EUPIC)
Danilo Hollosi - Project Group Hearing, Speech and Audio Technology, Fraunhofer IDMT
Jim Clarke - BIC Project Coordinator, TSSG
David Wortley - Freelance Consultant in Immersive and Emerging Technologies
Merten Koolen - Chairman of the Internet of Things Working Group, European Semiconductor Industry Association, NXP (TBC)
Juho Rissanen - Vice President, DigiEcoCity (TBC)
Q&A session
17:30 Concluding words
Kay Matzner - OpenChina-ICT project coordinator, Fraunhofer
Ardiel Cabrera - Project Officer, International Relations Unit, DG CONNECT, European Commission
17:45 Networking cocktail
18:00 End of Meeting
Organised by the OpenChina-ICT FP7 project under the aegis of the European Commission and supported by MOST and MIIT

OPENCHINA-ICT FINAL CONFERENCE

OpenChina-ICT

OpenChina-ICT Final Conference

Strengthening Cooperation in ICT Research between Europe and China

Radisson BLU Lietuva Hotel - Vilnius, Lithuania

November 5, 2013

Organised by the OpenChina-ICT FP7 project
Held under the aegis of the European Commission

BACKGROUND

The OpenChina-ICT project, supported by the European Commission (DG CONNECT) through its FP7 research-funding programme, aims at significantly contributing to the facilitation of ICT related research cooperation between Europe and China.

During the period 2012-2013, the OpenChina-ICT project has analysed the ICT research environment in Europe and China and identified the current and emerging research priority topics and the main research actors in both regions.

Achieving this overall objective has been supported through the completion of the different project activities, in particular the outputs of a Dialogue Conference and of two Thematic Workshops organized by OpenChina-ICT and on an in-depth survey of researchers carried out in both regions.

CONCEPT & OBJECTIVES

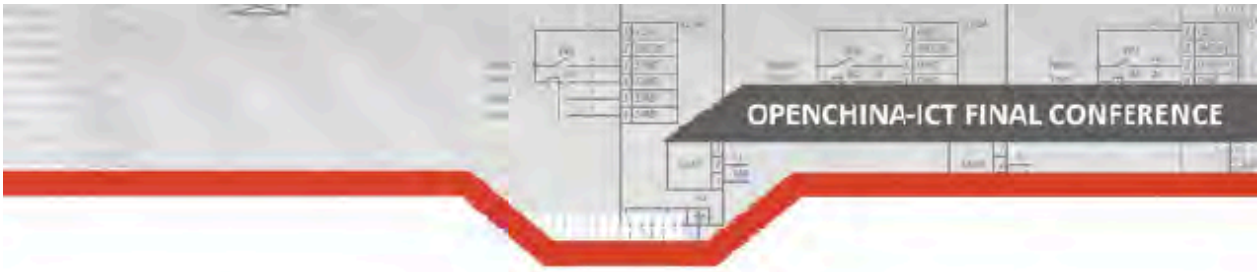
The OpenChina Final Conference will take place on November 5, 2013 in Vilnius, i.e. the day before the launch of the European Commission's ICT 2013 Event.

The objective of this Final Conference is to bring together policy and research stakeholders from Europe and China, to present the project final results, assess new alternative or novel ways to promote scientific cooperation in ICT between the two regions and provide recommendations towards more effective funding and more fruitful cooperation programs.

Among the main outcomes of the OpenChina-ICT project to be presented:

- Experts interviews to identify current and emerging research topics and priorities
- Dialogue Conference held in China in November 2012
- European and Chinese Roadmap Surveys on ICT research environment,
- Thematic Workshops organised in China in May and August 2013

Fraunhofer BSEAC



AUDIENCE & REGISTRATION

The main stakeholders from Europe and China, involved or interested in strengthened cooperation between the two regions, are invited to participate in the different sessions:

- Policy makers from Europe and China (DG CONNECT, MOST, MIIT)
- Representatives of other EU-funded projects or main initiatives
- Experts specialized in EU-China research collaboration (incl. the members of the OpenChina-ICT Advisory Board)
- Researchers in the ICT field from universities, research institutes and industrial companies

An audience of 150 participants is targeted. Registration is free of charge but compulsory (due to room restrictions). To register, please visit the OpenChina-ICT project website wwww.openchina-ict.eu or contact us at info@openchina-ict.eu.

TENTATIVE AGENDA

	09:00	10:30		11:00	12:30		14:00	15:30		16:00	17:30		17:45	18:00

Closing session Concluding words	*Networking cocktail*	*End of meeting*

SIDE EVENT TO THE ICT EVENT 2013

The OpenChina Final Conference will take place on November 5, 2013 in Vilnius, Lithuania, as a side event to the ICT Event 2013 conference and exhibition.

ICT Event 2013

Europe's most visible forum for ICT research and innovation, ICT2013 will take place from November 6 to 8, 2013 in Vilnius.

This event will bring together Europe's best & brightest in ICT research, with businesses old & new, web start-ups and digital strategists to chart a path for Europe's ICT research policy. Participants will have the opportunity to share their vision for the future with EU policy-makers, and see the latest advances in EU-funded ICT research.

Neelie Kroes, European Commission Vice President for the Digital Agenda will open the ICT2013 conference, a forum for debating the key issues among Europe as a home for innovation and a destination for ICT research.

The ICT 2013 event will be the first opportunity to learn the details of research funding for ICT-related projects under Horizon 2020, the EU's new research program for 2014-2020. The European Commission proposed an €80 billion package for research & innovation funding, as part of the drive to create sustainable growth and new jobs in Europe. Horizon 2020 will support the development of ICT in Science (in future and emerging technologies or e-Infrastructures); in industrial leadership (such as smart systems, robotics, photonics, etc.) and in societal challenges (such as eHealth, eGovernment and eSkills.)
