1 Introduction

1.1 Background

The aim of the **Ageing***Well* Network **is to build and animate a European network focused on improving the quality of life of older persons by promoting the market uptake of ICT solutions for Ageing well.**

To achieve its aim, the following five **main objectives** of the **Ageing***Well* project are:

- **Develop** guidelines for deployment and sharing of best practice between key competence centres;
- **Build** an ICT for Ageing Knowledge Centre with the aim to share the results with the Ageing Well Community;
- **Develop** an ICT for Ageing Society Strategic Agenda, with the aim of providing a study on options for future structure and implementation of EU innovation funding;
- **Promote** the European innovation reinforcement between innovative ICT industries & Ageing (in particular SMEs) and Venture Capital firms, Business Angels and other;
- **Raise awareness** within the European community of ICT & Ageing stakeholders through soft measures (web-based communication), and hard measures (organization of 3 international events and 11 national events).

1.2 Summary

This document presents a list of key stakeholders identified by the **Ageing***Well* network, at Regional, National, European and Global Level. Stakeholders include innovative ICT SMEs offering solutions for Ageing sector, venture capital firms, business angels, public authorities, among others.

Profile of stakeholders includes the following items: name of the entity, description, contact person, e-mail, telephone, website, country and category. The category is related to the main activity of the stakeholder, and for the **Ageing***Well* network the following categories will be considered:

- Housing & Insurance;
- ICT solutions provider;
- Industry;
- Investor;
- Public Authority;
- R&D organisation;
- User organisation;
- Projects / Programmes;
- Other organisation.

2 Key Stakeholders

In this section, the stakeholder's organizations identified by the **Ageing***Well* members are listed and a short description of each organization is presented. Then, the organisation's profile is illustrated by category and country.

2.1 Stakeholders List by Category

2.1.1 Housing & Insurance Organisations

Organisation: **Confort Keepers – (Conforto em Casa, Lda.)**		
Description: The main reason that led to their creation of Confort Keepers is related to the gap at the level of home support services involving non-medical care in Portugal. Confort Keepers mission is to provide a better quality of life to senior adults living in their own home and with Confort Keeprs help maintain a higher level of activity and autonomy. Comfort Keepers and the network partners are carefully selected and prepared to provide the following services: Family Care (companionship; preparation of customized meals; housekeeping;…); Personal Care (taking care of personal hygiene); Special Care (monitoring Alzheimer, Parkinson, chronic, degenerative and oncology diseases, among others); Permanent Care; Tele-Assistance Service (immediate support and assistance in emergency situations; guidance and Emergency Medicine; Indication of hospitals, clinics and pharmacies on duty); Alert Services (taking medications, medical consultations).

Organisation: **Critical Health, S.A.**

Description:

Critical Health is a spin-off of Critical Software encompassing all the healthcare activities that were being developed since 2006. Critical Software is a successful IT services company specialized in real-time systems for defense, aerospace and telecommunications with solid reputation for software reliability (CMMI-5, ISO9001, Spice). The new company represents a strong commitment from Critical Software to all its customers and partners in the Healthcare sector.

Critical Health was created to improve the Quality of Life and to reduce the total Healthcare Spending. It aims to achieve this vision by providing critical health information to everyone through the marketing of innovative and accessible technological products.

The company's objective, to build a valuable global business of Health Information Technology Products, is based upon the following three vectors:

Develop products to help prevent Loss of Vision and Loss of Mobility and Cognitive skills for Diabetics and people older than 65 years in developed countries;

Build Technological Partnerships with Internationally renowned Institutions;

Create a flexible organization based on a team of professionals guided by excellence and truth.

<tr><th colspan="3">Organisation: Stowarzyszenie Społeczeństwa Wiedzy</th></tr>
<tr><td colspan="3">Description:
Stowarzyszenie Społeczeństwa Wiedzy is a think tank established in 2006. The main goal of the association is improving quality of people's life by bridging the digital divide. By bringing computers, Internet and other technologically advanced devices into people's homes they would like to make them take part in society life, go back to professional environment. The organisation implemented in 2007 and 2008 two projects called Silver Internet 1 and 2, which were supposed to engage older people 50+ in using Internet, computers, mobile phones and digital cameras. It is also involved in the EU project Go-myLife which main objective os to improve the quality of life for older people through the use of online social networks combined with mobile technologies. Moreover, Stowarzyszenie Społeczeństwa Wiedzy is a member of the Coalition for the Digital inclusion of the 50+ Generation "M@turity in the net”.</td></tr>

Organisation: Infoelder		
Description: InfoElder is the website which includes all the information, services and products related to what a person might need in the second half of their life. In the later stages of life we begin to understand that part of our lives when we see ourselves gradually lightened from the economical burden of our children and the period when the dedication to professional life also decreases.As a consequence, we start to have more of the two resources that in the previous period were very limited: time, and a certain capacity for saving money. Retirement from a profession usually happens at some point in the later stages of our lives, so the free time at our disposal increases, but usually at the same time there is a reduction in disposable income. InfoElder is the meeting point between the elderly, their relatives and the companies and professionals whose products and services are needed in the later stages of everyone's life.		
Contact person:	**E-mail:** infoelder@infoelder.com	**Telephone:** 0034 93 504 56 46

2.3 Stakeholders Profile

In total, at this initial stage of the project, 114 stakeholders have been identified by the contractual members of the **Ageing***Well* network. When analyzing the organizations listed above by category (Figure 1), it is possible to observe that the majority of the identified stakeholders are user organizations (23%) and public authorities (21%).

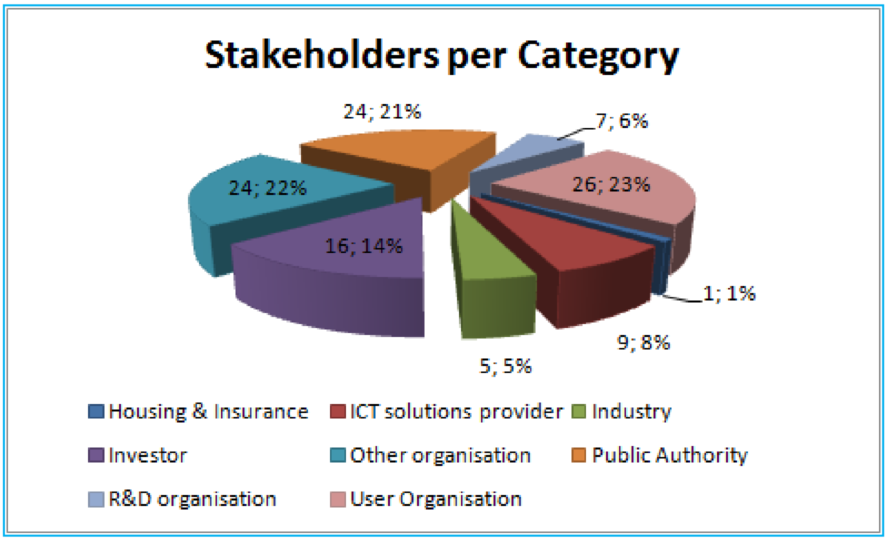

Figure 1 – Stakeholders per Category

Concerning location (Figure 2), the majority of stakeholders identified at this stage are located in Spain (30%), Romania (14%) and Poland (12%).

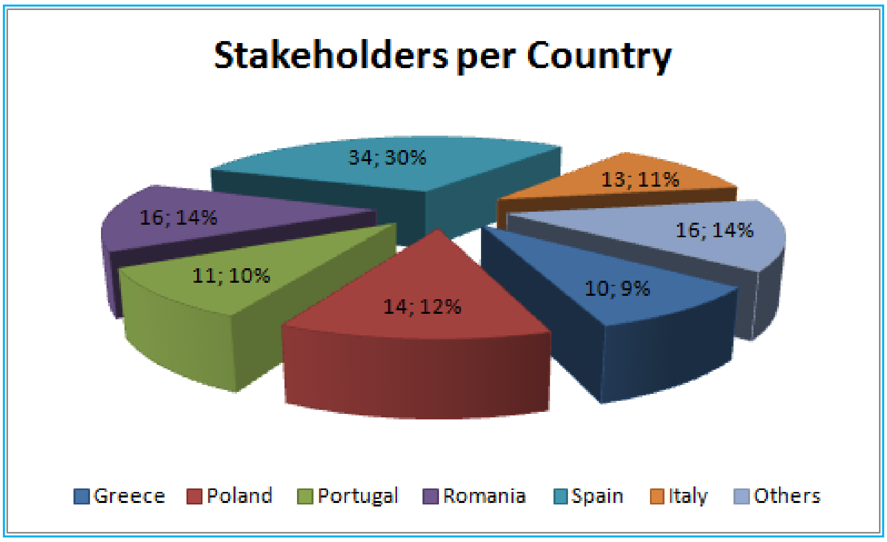

Figure 2 – Stakeholders per Country

Members will keep on identifying stakeholders in the ICT & Ageing sectors during the entire duration of the project lifetime, and therefore the list presented in this document will be updated continuously.
