

D5.3: RELEASE OF PUBLIC L3DATA

David Lewis

Distribution: Consortium Public Report

Federated Active Linguistic data CuratiON (FALCON)

FP7-ICT-2013-SME-DCA

Project no: 610879

Document Information

Deliverable number:	5.3
Deliverable title:	Release of Public L3Data
Dissemination level:	PU
Contractual date of delivery:	31 st August 2015
Actual date of delivery:	9 Nov 2015
Author(s):	David Lewis
Participants:	TCD
Internal Reviewer:	DCU
Workpackage:	WP5
Task Responsible:	T5.3
Workpackage Leader:	David Lewis

Revision History

Revision	Date	Author	Organization	Description
1	26/07/2014	David Lewis	TCD	Template and initial draft
2	5/10/2015	A. Maldonado, F. Tar, A. Calvo	TCD	Technical input
3	9/11/2015	D.Lewis	TCD	Reviewed and submitted

1. PUBLIC L3DATA OVERVIEW

This document briefly outlines the public linked data generated and published by the FALCON project.

This data is made available via the following mechanisms:

- HTTP access to stored L3Data CSV and CSVW meta-data files.
 - <https://l3dsvr.peep.ie>
- A SPARQL endpoint from which queries over a set of data can be served. This is based on a Virtuoso triple store server preloaded with annotations between a set of DG-T Translation Memories and Eurovoc term assembled as part of the FALCON test suite:
 - <http://peep.ie:8890/sparql>
- An annotation validation end point, that extracts annotations between segments and terms and allows users to validate them and save the validation as further. This is joint development with the LIDER project intended to show how third party validation of published annotations could be performed. It offers a user interface for selecting sets of annotations, performing validations and publishing those annotations as further validation annotation of the original segment-term annotations:
 - <http://halcon.peep.ie>
