EXECUTIVE SUMMARY

This report is PART 1: Description of project activities, dissemination and use, and annex of the project deliverables of the Management Report (Part 2: Justification of cost items and resources). It forms Part 1 of Deliverable 20 of the EuroMedCitrusNet project (Contract Number 43146), a Specific Support Action funded under the Food Safety and Quality Thematic Priority of the European Commission’s (EC’s) Sixth Framework Programme. The project is co-ordinated by Sociedade Portuguesa de Inovação (SPI), from Portugal. The project partners are:

- University of Catania, Italy (CAT);
- Cukurova University, Turkey (CUR);
- National Agricultural Research Foundation, Greece (NAGREF);
- EUROQUALITY, France (EQY);
- Asociacion de Investigacion de la Industria Agroalimentaria, Spain (AINIA);
- Institut Agronomique et Veterinaire Hassan II, Morocco (IAV);
- Institut National Agronomique de Tunisie, Tunisia (INAT);
- Horticultural Research Institute, Egypt (HRI);
- Consorzio Euroagrumi O.P, Italy (CE);
- Station D’Emballage D’Agrumes Kabbage Souss, Morocco (SKS).

This report comments on the work completed in each of the work packages, aspects of project management and the dissemination and use of the project results. The deliverables associated with the project activities are provided as annexes to this report. They include:

- D1 First Project Team Meeting and Minutes;
- D2 Project Administrative Report;
- D3 Project Website and Message Forum;
- D4 Project Database Structure;
- D5 Project Brochure and Other Promotional Materials;
- D6 Communication Strategy;
- D7 Second Project Team Meeting and Minutes;
- D8 First Project Workshop and Proceedings;
- D9 Sector Analysis Report;
- D10 Third Project Team Meeting and Minutes;
- D11 Second Project Workshop and Proceedings;
- D12 Needs Assessment Report;
Final Project Report

- D13 Preliminary Project Proposals;
- D14 Policy Recommendations Report;
- D15 Other promotional Materials;
- D16 Fourth Project Team Meeting and Minutes;
- D17 European Regional Conference and Proceedings;
- D18 Non-EU Mediterranean Regional Conference and Proceedings;
- D19 Sustainable Network Strategy;
- D20 Management Report (provided as a separate report).

1 OVERVIEW AND WORKPACKAGE PROGRESS OF THE PROJECT

1.1 Project Objectives

The citrus industry's importance to the Mediterranean is clear, its countries being among the world's top producers and Europe one of the largest consumers. Increased demand in recent years has been fuelled by the promotion of fruit for a well balanced diet and consumer awareness of citrus fruit benefits.

The main aim of the EuroMedCitrusNet project is to promote improvement in citrus safety and quality at all stages of the supply chain through co-operation both internationally and between research organisations and commercial operators including SMEs, to create a network of horizontal research interest, especially for the Mediterranean region. The project will promote improved safety and quality of Mediterranean citrus supply chains through:

- A comprehensive description of current policies, procedures and research relating to the Mediterranean citrus sector to improve quality and safety of citrus supply chains;
- A needs assessment survey to focus research and development on improving safety and quality including policy recommendations, an action plan of research agendas and preliminary project proposals;
- Mediterranean Networking initiatives to stimulate international co-operation and support policy development by integrating current related research and providing added value;
- Providing information to facilitate access to knowledge, training and technology, increasing SME participation in research, and, thus, improving the exploitation of results, and accelerating innovation;
- Bringing together scientists and industrialists to create a sustainable Mediterranean network for the citrus sector to support research relevant to safe and high quality cross-border supply chains.
1.2 Workpackage progress

The progress of workpackages is summarised in the following tables:

<table>
<thead>
<tr>
<th>Description of Task</th>
<th>Details of Work Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>WORKPACKAGE 1</td>
<td></td>
</tr>
<tr>
<td><strong>Deliverable 1. First Project Team Meeting and Minutes</strong></td>
<td>This deliverable was accepted at the interim report.</td>
</tr>
</tbody>
</table>

Conduct a project team meeting. The objectives of the meeting were to:
- Achieve a ‘team spirit’, especially important given the range of project partners’ skills, experience and home locations;
- Discuss and further specify a general method and communication structure for the project;
- Create a generic view on the existing knowledge and current practices within the food chains in the participating countries – focusing on the fruit, vegetable and meat sectors;
- Establish periodical meetings between the project partners for project follow-ups and evaluations;
- Design a methodology for the research work, namely the collection and analysis of data. This will include providing the framework for the Current Sector Analysis (WP3).
- Gather information on the Food Quality and Safety standards in the citrus sector in the Mediterranean region.

As this meeting took place later in the project than initially planned, in order that Partners had the funds for travelling, most of the actions planned for the First Project Team Meeting were achieved through earlier interactions between the project Partners such that the project deliverables were not negatively affected.

The First Project Team meeting took place at the Ipanema Hotel Porto on the 15th and 16th of March 2007.

As this meeting took place later in the project than initially planned, in order that Partners had the funds required for travelling, its objectives were more orientated towards project progress.

The minutes of this meeting have been attached as Annex 1.

In addition, prior to the First Project Team meeting, a meeting was held between the coordinator and the Mediterranean Partner coordinator in Morocco from 7th-9th November, 2006. Other communication among the Partnership such as emails and phone calls was also done before the First Project Meeting.

## Description of Task

### Deliverable 4 Project Database Structure
Develop the database structure, which will allow users to search for organisations through a series of criteria (e.g. organisation name, type of organization, organisation country). The projects section within the database will allow registered users to add projects, which will be associated with their organisations. It will also include capabilities for the user to search for existing projects related to citrus, upload relevant documents and suggest useful web links and other agro-food resources.

**Details of Work Completed**
This deliverable was accepted at the Interim Report.
Provided as planned and screen shots of the registration and search pages are attached as Annex 4 to this report. The Database is online and interested parties have registered their details.

### Deliverable 5 Project Brochure and Other Promotional Materials
Develop a project brochure and other publication materials, including the template for the electronic newsletter (to be distributed by the mailing list) highlighting the methodology, objectives and resulting benefits of this project. The professional publication materials, which will be available in English and French, will be an important support in this structure to develop people’s interest and support.

**Details of Work Completed**
This deliverable was accepted at the Interim Report.
The brochure was provided as planned and is attached as Annex 5 to this report.
In addition, two newsletters and two press releases have also been delivered (further Newsletters were provided under Deliverable 15).

### WORKPACKAGE 2

#### Deliverable 3 Project Website and Message Forum
Design of a website and its functionalities, including a message forum and a database. The website will be updated as the project progresses and will contain downloadable files of all public project deliverables. The website will be registered with the leading Internet search engines and contain links to other relevant food quality and safety networks. The website will remain operative, maintained by SPI, after the project end.

**Details of Work Completed**
Provided at www2.spi.pt/euromedcitrusnet as planned. Screen shots of the homepage, project documents page, links and message forum are attached as Annex 3 to this report. The website already has downloadable project documents, useful links, and users registered in its message forum.

</table>
| Deliverable 15 Other Promotional Materials | Other promotional materials such as press releases and posters will be produced as required during the project as well as an updated brochure for dissemination.  
The updated brochure for dissemination was provided for distribution at the Dissemination Conferences in Catania, Italy and Agadir, Morocco as well as for partners to distribute among interested parties in their respective countries. It is attached to this report as Annex 15.  
Further press releases and four more newsletters were also produced as required. The Newsletters are included on the project website. |
| WORKPACKAGE 3                       |                                                                                                                                                          |
| Deliverable 7 Second Project Meeting and Minutes | The Second Project Meeting took place on 25th June 2007 at Cukurova University, Turkey. In the meeting the status of the project activities including the different deliverables was discussed. In addition, deliverables to be completed in the next six months were also presented.  
The minutes of this meeting have been attached as Annex 7.  
This deliverable was accepted at the Interim Report. |

---

EuroMedCitrusNet - Safe and High Quality Supply Chains and Networks for the Citrus Industry between Mediterranean Partner Countries and Europe
### Description of Task

#### Deliverable 8 First Project Workshop and Proceedings

The First International Workshop will be organized in Turkey to discuss and validate the results of the conducted sector analysis and to identify major challenges and targets to boost cross-border citrus supply chains and networks of Mediterranean Partner countries and EU countries. The workshop participants will consist of project partners and experts from public and private parties working in the citrus sector and field of supply chains and networks. The budget provides for the funding of 12 participants (other than the project partners) who are those judged to be the most important attendees (identified in the sector study). These 12 participants will mainly come from the Mediterranean countries not represented by the project partners and from other connected networks. The workshop will also be further promoted to the wider citrus sector to attract other attendees.

This deliverable was accepted at the Interim Report.

This First EuroMedCitrusNet Project Workshop took place at Cukurova University, Turkey on 26th June 2007. The workshop brought together 61 participants from research institutions and industry across the Mediterranean.

The Workshop Proceedings have been attached to this report as Annex 8 and the presentations are on the project website.

#### Deliverable 9 Sector Analysis Report

The Sector Analysis Report will include findings on current major policies, procedures and knowledge networks, including the major national players in the knowledge market on citrus supply chain and network management. The document shall comprise the major knowledge bases in the participating countries, an explanation and specification of organizations involved, resources (source) and product group.

This deliverable was accepted at the Interim Report.

The Sector Analysis Report was provided as planned and is attached to this report as Annex 9.

| Deliverable 10 Third Project Team Meeting and Minutes | The Third Project Meeting took place on 2nd April 2008 at Horticultural Research Institute, Egypt. In the meeting the status of the project activities including the different deliverables was discussed.  
The minutes of this meeting have been attached as Annex 10. |
| Deliverable 11 Second Project Workshop and Proceedings | The Second EuroMedCitrusNet Project Workshop took place at Horticultural Research Institute, Cairo, Egypt on 3rd April 2008. The workshop brought together 120 participants from research institutions and industry across the Mediterranean to discuss the needs of the sector with regard to research for improving the safety and quality of citrus supply chains as well as policies and proposals for increasing future collaborative activities between the EU and Mediterranean Partner Countries. Furthermore, expert presentations on various topics related to citrus quality and safety provided a means for participants to hear about current situation and state of the art research and technologies employed in these areas.  
The workshop was given a high profile in Egypt with television media present at the workshop and the EuroMedCitrusNet project team met with the Minister for Agriculture due to his interest in the project and its results.  
The Workshop Proceedings have been attached to this report as Annex 11 and the presentations are on the project website. |
<table>

</table>
| **Deliverable 12 Needs Assessment Report**  
Report on the results of the Needs Assessment Survey to identify the existing knowledge gaps and further needs regarding quality and safety supply chains in the citrus sector. | The Needs Assessment Report was provided as planned and is attached to this report as Annex 12. |
| **Deliverable 13 Preliminary Project Proposals**  
Document detailing proposals to address needs identified in the Needs Assessment Survey. These will be discussed at the Second International Workshop and presented at the Dissemination Conferences. | The Preliminary Project Proposals were provided as planned and is attached to this report as Annex 13. |
| **Deliverable 14 Policy Recommendations Report**  
Outline to prioritise the policy recommendations required to close the major gaps identified within the needs assessment. The draft will be discussed at the Second International Workshop. | The Policy Recommendations Report was provided as planned and is attached to this report as Annex 14. |

| **Deliverable 18 Non-European Regional Conference and Proceedings**<br>This will be a one-day regional conference organized by the hosting Moroccan partner and SPI. The Conference will present the key project findings and will have a non-EU country perspective, focussing on the concerns of these other Mediterranean countries. | The Non EU Mediterranean Regional Conference was held at the Hotel Beach Club, Agadir, Morocco on 13th October 2008. The conference brought together 270 participants (including partners and speakers) from research institutions and industry across the Mediterranean.<br><br>The conference was given a high profile in Morocco with television and radio media present at the workshop as well as the monthly fruit and vegetable industry journal Pack info. In addition to project funding, local industry also contributed to the event including: Freshfruit Morocco; Maroc Fruit Board; COPAG; Les Domaines and Delassus.<br><br>The Conference Proceedings have been attached to this report as Annex 18 and the presentations are on the project website. |
2 CONSORTIUM MANAGEMENT

Consortium management is led by SPI. The most significant management issue during the project was the replacement of the partner for Egypt with the organization Horticultural Research Institute (HRI) due to difficulties of the organization initially proposed in signing the project contract. This change did not significantly affect the progress of project work and all the tasks assigned to the original organization proposed were completed by HRI.

2.1 Project Meetings

Prior to the First Project Meeting interactions took place among the Partnership such as emails and phone calls. These interactions also included a meeting between the coordinator and the Mediterranean Partner coordinator in Morocco from 7th-9th November 2006.

The First Project Team Meeting of the EuroMedCitrusNet project took place on 15th and 16th March 2007 at the Ipanema Hotel Porto, Portugal and was hosted by the coordinator of the project, Sociedade Portuguesa de Inovação (SPI).

Those present included representatives from the following project Partner organisations including:

<table>
<thead>
<tr>
<th>Organisation</th>
<th>Name of Representative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociedade Portuguesa de Inovação (SPI) (Coordinator)</td>
<td>Rachel Newton, Cindy Wu, Dora Fazekas</td>

<td>Ikbal Srairi</td>
</tr>
</tbody>
</table>
Two organisations could not be present: INAT and the organization representing Egypt (still subject to approval by the EC at the time of the meeting).

Detailed information on the First Project Meeting is provided in Annex 1.

The Second Project Team Meeting of the EuroMedCitrusNet project took place on 25th June 2007 at Cukurova University, Turkey and was hosted by Prof. Turgut Yesiloglu, Cukurova University (CUR).

Those present included representatives from the following project Partner organisations including:

<table>
<thead>
<tr>
<th>Organisation</th>
<th>Name of Representative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociedade Portuguesa de Inovação (SPI) (Coordinator)</td>
<td>Rachel Newton, Dora Fazekas</td>

</tr>
</tbody>
</table>

Three organisations could not be present:

- University of Catania
- Asociación de Investigación de la Industria Agroalimentaria
- Consorzio Euroagrumi O.P.

Detailed information on the Second Project Meeting is provided in Annex 7.

The Third Project Team Meeting of the EuroMedCitrusNet project took place on 2nd April 2008 at Horticultural Research Institute, Egypt and was hosted by Prof. Salama Eid Salem Sherif, Horticultural Research Institute (HRI).

Those present included representatives from the following project Partner organisations including:

<table>
<thead>
<tr>
<th>Organisation</th>
<th>Name of Representative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociedade Portuguesa de Inovação (SPI) (Coordinator)</td>
<td>Rachel Newton</td>

</tbody>
</table>

One organisation could not be present due to the cancellation of a flight:

- Institut National Agronomique de Tunisie

Detailed information on the Third Project Meeting is provided in Annex 16.
3 DISSEMINATION AND USE

The partners of the project were responsible for the dissemination of the project in their own countries and also used their personal networks of contacts to reach those in the Mediterranean Partner Countries not included in the project partnership. In particular, the programs of the project events achieved their aim to include at least one speaker from these countries as a means of increasing their profile in the network. Dissemination among partners was mainly achieved through the regular sending of the press releases and newsletters, but also through invitations to join project events and direct contacts with relevant organizations during the development of the project’s activities, such as the collection of information for the Sector Analysis Reports and the conduction of the Needs Assessment Survey.

The dissemination activities performed in the project are summarized as follows:

- Design, production and distribution of a project brochure and dissemination brochure in English and French (See Annexes);
- Preparation and maintenance of a project website with information related to the project including project objectives, methodology, partners, project documents, project events, useful links for those interested in the Mediterranean citrus sector research, and opportunities for participation in FP7 particularly in improving quality and safety in citrus sector supply chains, message forum and online database;
- Press releases to introduce the project, announce the project website, message forum, the project reports and the Project Workshops and Conferences, as well as report about the project events (sent by each of the partners to international media and other news providers listed in the communication strategy (and to addition contacts developed after this document was produced), including for example, UltimateCitrus. com, a portal to the world of citrus with links and news, Freshplaza.com, news source for companies operating in the global fruit and vegetable sector, and other local media and other news providers in the project participating countries);
- Six newsletters sent out by each of the partners to appropriate contacts as with the press releases (and also placed on the project website) containing project news (on topics similar to those in the press releases, but with more information), other citrus sector related news such as reports on events of interest, abstracts of papers, or other relevant news, announcements of forthcoming citrus sector related events, as well as lists of relevant publications;
• Four project events including:
  
  - First Project Workshop that was held on 26th June 2007 at Cukurova University, Turkey bringing together participants 61 participants from research institutions and industry across the Mediterranean. Sponsorship was obtained from local industry to increase the overall (see Annex);
  
  - The Second EuroMedCitrusNet Project Workshop that was held on 3rd April 2008 at Horticultural Research Institute, Cairo, Egypt on. The workshop brought together 120 participants from research institutions and industry across the Mediterranean. The workshop was given a high profile in Egypt with television media present at the workshop and the EuroMedCitrusNet project team met the Honourable Minister of Agriculture, Mr. Amin Abaza who expressed his deep interest about the project activities and emphasized at the same time his awareness of the project goals. The meeting was also attended by Dr. Ayman Abou Hadid, the director of ARC. (see Annex);
  
  - The European Regional Conference was held at University of Catania, Catania, Italy on 11th July 2008. The conference brought together more than 100 participants (without partners and speakers) from research institutions and industry across the Mediterranean. The conference was given a high profile in Catania with television media present at the workshop and a newspaper article promoting the event (See Annex).
  
  - The Non EU Mediterranean Regional Conference was held at the Hotel Beach Club, Agadir, Morocco on 13th October 2008. The conference brought together 270 participants (including partners and speakers) from research institutions and industry across the Mediterranean. The conference was given a high profile in Morocco with television and radio media present at the workshop as well as the monthly fruit and vegetable industry journal Pack info. In addition to project funding, local industry also contributed to the event including: Freshfruit Morocco; Maroc Fruit Board; COPAG; Les Domaines and Delassus (See Annex).
In addition to the project deliverables, described above the Partners promoted the project in the following ways:

- After attending the project events, the Egyptian partner (HRI) prepared an inclusive summary of the aforementioned activities and sent this to the Honourable the Minister of Agriculture (MOA) and to the Director of the Agricultural Research Centre (ARC) with the intention of getting them to be involved and well informed about the activities of the EuroMedCitrusNet project so that they could better respond to the needs and interests of Citrus sector coinciding with the project mission itself. Moreover, the summary was also discussed in more details within the monthly meetings of both of ARC (including all its institute directors) and the Citrus Research Institute (CRD) as well;

- Article about the project in the greek magazine FRUTONEA, 2007.
- Article about the project in TECNOALIMENTALIA 26th, September 2007 disseminated to more than 1000 agrofood entreprises (ainia);
- Murcia Food Brokerage Event, on 29th -30th October, 2007 in Murcia, Spain (ainia);
- 2º Congresso Nacional de Citricultura, 22-24th January 2008, Universidade de Faro, Portugal (SPI) (event with international speakers attended by most of the national citrus sector) poster prepared;
- EuroAgroFruits Fair – Traceability Event, 17th April 2008, Spain (ainia);

ANNEX 3 – DELIVERABLE 3 PROJECT WEBSITE AND MESSAGE FORUM

Below is the website homepage that can be accessed at www2.spi.pt/euromedcitrusnet

OBJECTIVES:

The project will promote improved safety and quality of Mediterranean citrus supply chains through:

- A comprehensive description of current policies, procedures and research related to the Mediterranean citrus sector to improve quality and safety of citrus supply chain.
- A needs assessment survey to focus research and development on improving safety and quality including policy recommendations, an action plan of research agendas and preliminary project proposals.
- Mediterranean Networking initiatives to stimulate international co-operation and support policy development by integrating current related research and providing added value.
- Providing information to facilitate access to knowledge, training and technology, increasing SME participation in research, and, thus, improving the exploitation of results, and accelerating innovation.
- Bringing together scientists and industrialists to create a sustainable Mediterranean network for the citrus sector to support research relevant to safe and high quality cross-border supply chains.
Below is the page from which project documents can be accessed.

Below is the page where useful links of relevant projects related to the citrus sector can be found.
Below is a screen shot of the message forum in the project website with registered users.
ANNEX 4 – DELIVERABLE 4 PROJECT DATABASE STRUCTURE

Below are screen shots showing the online form for registration in the database. Firstly, personal contact details are requested (shown below). A red * indicates mandatory data.
The next part of the form concerns the organization to which the individual is affiliated and describes their citrus activity including areas of interest, projects and facilities.

The final part of the form asks for details of geographical activity and user details.
Registered users have the ability to search the database or update their registration profile for example with new contact details or with new citrus activity.

Registered users can search the database using a number of criteria, including name, organization, country, area of interest, and project.
