

# iMERA-Plus FINAL PUBLISHABLE REPORT

## CONTENTS

### 1 Executive Summary

### 2 Project context and main objectives

- 2.1 Background
- 2.2 Towards iMERA-Plus
- 2.3 iMERA-Plus Objectives

### 3 Main S & T results/foregrounds

- 3.1 Call process and selection of the Joint Research Projects
- 3.2 The Joint Research Projects
  - 3.2.1 e-MASS: The watt balance route towards a new definition of the kilogram
  - 3.2.2 NAH: Avogadro and molar Planck constants for the redefinition of the kilogram
  - 3.2.3 REUNIAM: Foundations for a redefinition of the SI base unit ampere
  - 3.2.4 Boltzmann constant: Determination of the Boltzmann constant for the redefinition of the kelvin
  - 3.2.5 OCS: Optical clocks for a new definition of the second
  - 3.2.6 qu-Candela: Candela: Towards quantum-based photon standards
  - 3.2.7 Breath analysis: Breath analysis as a diagnostic tool for early disease detection
  - 3.2.8 Regenmed: Metrology on a cellular scale for regenerative medicine
  - 3.2.9 Brachytherapy: Increasing cancer treatment efficacy using 3D brachytherapy
  - 3.2.10 EBCT: External Beam Cancer Therapy
  - 3.2.11 TRACEBIOACTIVITY: Traceable measurements for biospecies and ion activity in clinical chemistry
  - 3.2.12 CLINBIOTRACE: Traceability of complex biomolecules and biomarkers in diagnostics effecting measurement comparability in clinical medicine
  - 3.2.13 Nanoparticles: Traceable characterization of nanoparticles
  - 3.2.14 NANOTRACE: New Traceability Routes for Nanometrology
  - 3.2.15 NIMTech: Metrology for New Industrial Measurement Technologies
  - 3.2.16 Long distance: Absolute long distance measurement in air
  - 3.2.17 Power & Energy: Next generation of power and energy measuring techniques
  - 3.2.18 NanoSpin: Nanomagnetism and Spintronics
  - 3.2.19 JOSY: Next generation of quantum voltage systems for wide range applications
  - 3.2.20 ULQHE: Enabling ultimate metrological Quantum Hall Effect (QHE) devices
  - 3.2.21 EMF and SAR: Traceable measurement of field strength and SAR for the Physical Agents Directive

### 4 Potential impact, the main dissemination activities and the exploitation of results

- 4.1 Dissemination
  - 4.1.1 Joint Research Project (JRP) dissemination
  - 4.1.2 Programme level dissemination
- 4.2 Impact from the JRPs
  - 4.2.1 Support to industry and economic growth
  - 4.2.2 Contributions to standardisation
  - 4.2.3 Support for regulation, Directives and quality of life
  - 4.2.4 Support for the scientific community
- 4.3 The Impact of iMERA-Plus
  - 4.3.1 Benefits of collaboration
  - 4.3.2 Scientific integration - Co-ordination and integration of NMI and national programmes
  - 4.3.3 Financial integration
  - 4.3.4 Management integration
  - 4.3.5 How the EMRP Article 185 built on the success of iMERA-Plus
- 4.4 Conclusions

### 5 Public website address and contact details

## **TABLE OF TABLES**

Table 1: The Joint Research Projects

## **TABLE OF FIGURES**

Figure 1: Schematic of call and JRP selection process
