## PHOTOS

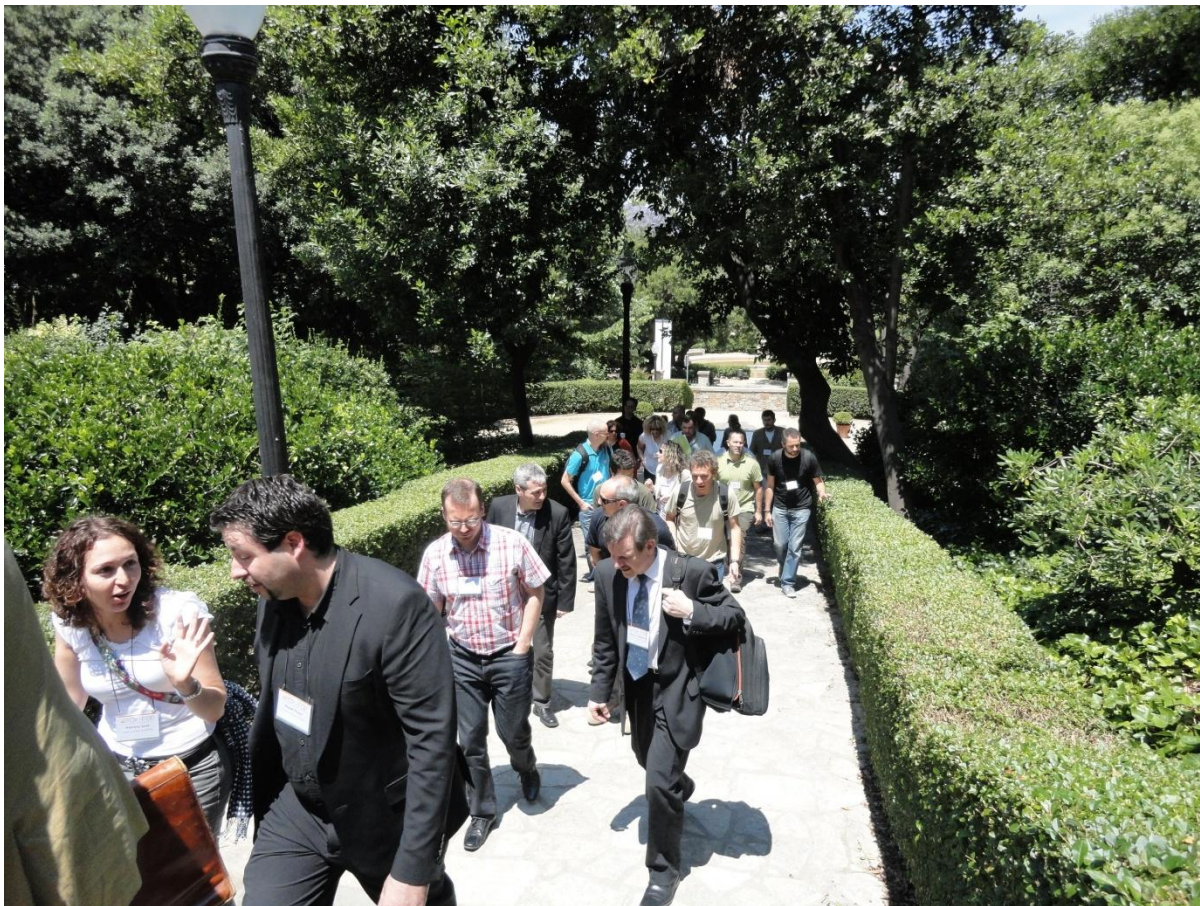

The Department of Agriculture, Livestock, Fisheries, Food and Natural Environment and the Forest Sciences Centre of Catalonia organized a conference on the future and strategies for the forestry sector at the Botanical Institute of Barcelona on 15 June 2011. Over 100 forest professionals gathered to discuss the future challenges the sector is facing, as well as the contribution the forest sector can make in addressing global challenges such as climate change.

## ENO Tree Planting Day 20 May, 2011

Environment Online - ENO is a global virtual school and network for sustainable development. Environmental themes are studied throughout the school year and campaigns arranged simultaneously around the world. Twice a year, in May and in September the ENO Tree Planting Day is arranged all around the world. Around one million trees will be planted to celebrate the day (<http://www.enoprogramme.org/>). One of the trees in Joensuu now carries the RoK-FOR name, thanks to WP4 Leader Päivi Pelli and her team from the European Forest Institute.

**The first RoK-FOR conference in Biarritz 14 October** gathered over 90 participants from forestry sector, bioenergy, wood construction and bio-based products to share ideas about developing research-driven clusters in accordance with the European Lead Market Initiative. All RoK-FOR regions – Aquitaine and the Basque Country, Catalonia, Baden-Württemberg, North Karelia and cross-border cluster Croatia - Serbia – displayed their regional opportunities and challenges in developing the Lead Market areas.
