

# **IPERCOOL: Interpretation and Parameterization of Extremely Red COOL dwarfs**

**International Research Staff Exchange  
Scheme # 247593**

**The logo illustrates the overall structure. The four nodes are Italian National Institute for Astrophysics (INAF, blue), the Center for Astrophysical Research at the University of Hertfordshire (CAR-UH, yellow), the National Brazilian Observatory (ON/MCT, green) and the Shanghai Astronomical Observatory (SHAO, red). The exchanges are made only between the European and Non-European partners. All of the consortium can share data via a central mysql DB with web and direct interfaces.**
