

## Tables EHRI Final Report

### 2. Summary description of project context and objectives

#### 2.3 Objectives

Table 1 Four specific objectives

No	Objective title
OB 1 Management	<i>Organise and manage a network of 20 partners and a number of associated partners to deliver an integrated European Holocaust Research Infrastructure within clearly defined timelines and budget</i>
OB 2 Networking (including dissemination) activities	<i>Involve the research community and support a new phase of trans-national research and collaboration towards new research questions and methodologies and initiate new and enhanced research into the Holocaust as a Europe-wide phenomenon</i>
OB 3 Trans-national access and service activities	<i>Reach out to and support the user community through a high quality controlled trans-national access programme setting new standards of best practice for infrastructure access and services</i>
OB 4 Joint Research activities	<i>Integrate Holocaust archival material and research infrastructures and improve the quantity and quality of metadata and online access and collaboration services through a VRE using advanced e-Science methodologies and technologies based on in-depth investigation of requirements, resources and existing standards.</i>

### 3 Description of the main S&T results/foreground

#### 3.3 Scientific technical outcomes of EHRI

Table 2 Web service layer

URI	Function
{content-type}	POST to create a new item of a given type
{content-type}/{identifier}	GET, PUT, DELETE to fetch, update, and remove an item
{content-type}/{identifier}	POST to create a <i>child</i> item
{content-type}/list	List items of a given type
{content-type}/count	Count items of a given type

## 4 The potential impact

### 4.4 Main dissemination activities and exploitation of results

Table 1 Stakeholders

Stakeholder	Interest / stake	Importance
Historians and researchers in other disciplines	Simplified access to relevant tools, data and collaborative spaces.	Very High
Archives, museums and other cultural industries	Reuse of their data for research and innovation purposes; enhancement of their business function as memory institutions	Very High
Public	Access to source data, research findings, and educational tools on the Holocaust.	High
External companies (especially in the technology sector)	Access to innovative tools and solutions in the fields of data integration; multi-lingual knowledge representation and retrieval.	Med. - High
Research funding bodies	Case study for future use of digital data for humanities research.	Med. - High
Policy makers and other governance actors	Integration of EHRI resources in Holocaust remembrance; policy development for Holocaust research and education.	Med. - High
Other Infrastructure projects (especially ESFRI)	EHRI as an advanced use case for a successful trans-national Research Infrastructure in the humanities	Med. - High
NGOs and humanitarian organisations; educators and teachers of the Holocaust	Access to source data, research findings, and educational tools on the Holocaust.	Low - Med

#### 4.4 Main dissemination activities and exploitation of results

Table 2: Main dissemination measures

Quantity	Dissemination Activity	Audience	Purpose	Key Message
16 newsletters across project	EHRI Newsletters	All stakeholders	Inform Promote	Up-to-date information about the project and the wider EHRI network, including details about forthcoming events, access opportunities, and project results
4	e-Newsletters for Experts in Holocaust Documentation	Archives, museums, cultural industries; Historians, researchers;	Inform Engage	In-depth information about issues and new insights relating to methodologies for Holocaust research and documentation
Throughout the project	Project Website and Twitter	All stakeholders	Awareness Inform Engage Promote	Continuously updated information on the project, its context; the opportunities it offers and its results
7	Press Releases	All stakeholders	Awareness Inform Promote	EHRI is an innovative project demonstrating next generation research
2	Flyer/PR material	Historians, researchers; archives, museums, cultural industries	Awareness Promote	EHRI is an innovative infrastructure that can advance Holocaust research and documentation
3	Videos	All stakeholders	Awareness Promote	EHRI is building an infrastructure that enhances research and helps to keep the memory of the Holocaust alive

<b>Quantity</b>	<b>Dissemination Activity</b>	<b>Audience</b>	<b>Purpose</b>	<b>Key Message</b>
5	General Partner Meetings	EHRI consortium	Inform Engage	Inform on the progress of the project and engage all partners to deliver a self-developing and sustainable community
3	Major conferences	All stakeholders	Engage Promote Inform	Discussion of key themes surrounding EHRI and engagement of the wider community
17	Workshops	all stakeholders	Awareness Engage Inform	Enlistment of consortium partner and other relevant stakeholders to advance the knowledge production in EHRI, and discuss its results
34	Conference Presentations	Historians, researchers; archives, museums, cultural industries; other infrastructures; public.	Inform Engage Promote	The EHRI Research and Development work is of scholarly interest and undertaken with rigour
7 published to date with additional papers in the pipeline.	Academic publications (books, journal articles and chapters)	Historians, researchers; archives, museums, cultural industries; other infrastructures; policy makers; public.	Awareness Inform	The EHRI Research and Development work is of scholarly interest and undertaken with rigour
