

## FunDivEUROPE study sites

Locations of the study sites that form the different research platforms in the FunDivEUROPE project: the Exploratory Platform (filled circles), the Experimental Platform (stars) and Inventory Platform (dark grey countries). The six 'exploratory regions' were selected to represent major European forest types. Some of the experiments were in fact established in several localities within a region (FORBIO, BIOTREE) and the figure indicates their approximate location. Modified from:

Baeten, L., et al. (2013) A novel comparative research platform designed to determine the functional significance of tree species diversity in European forests. *Perspectives in Plant Ecology Evolution and Systematics* 15, 281-291.
