

THE ISSUE

Traffic Health Environment

Intelligent Solutions for Sustaining Urban Economies

REGIONAL POSTER MIDI-PYRENEES /AQUITAINE

Two French organisations are involved in the FP7 project THE ISSUE:
Aerospace Valley and the South West Infrastructure Technical
Research Centre (CETE SO)

Issues linked to **urban mobility** and to **intermodality** are at the heart of transport policy and urban development in the fast growing Midi Pyrenees and Aquitaine regions.

These two regions have a **high technological potential** with regards to **innovation**, space technology and **satellite applications**, from remote sensing to satellite localization. **CETE SO** and the members of **Aerospace Valley** Competitiveness Cluster have established **many expertise** in these areas.

Taking into account **regional innovation** and **advanced technology** in order to develop our regional **transport policies** and to **encourage economic** growth and job creation in our regions, in a sustainable way. These are our mains priorities in the project.
