

Annex to final report: drawings Energy Dialogue Event

Brussels, 18 November 2015

These drawings were made at R&Dialogue's Energy Dialogue Event by artist Pieter Fannes (www.pieterfannes.com). With proper mentioning of the artist's name and website address, these drawings are available to be used in communication in the context of the R&Dialogue project. With upload restrictions of the EC's Participant portal, we had to include the low resolution drawings. High resolution drawings are available on request at info@rndialogue.eu.

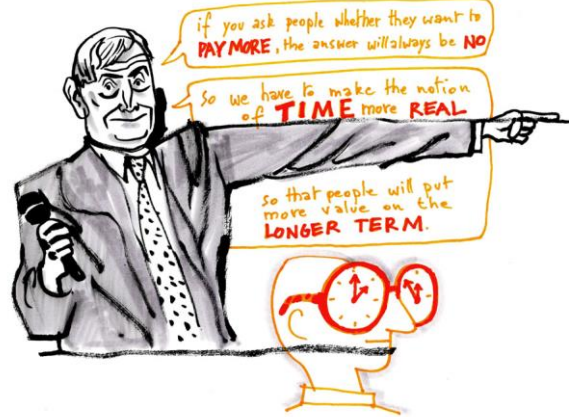

R&Dialogue

R&Dialogue

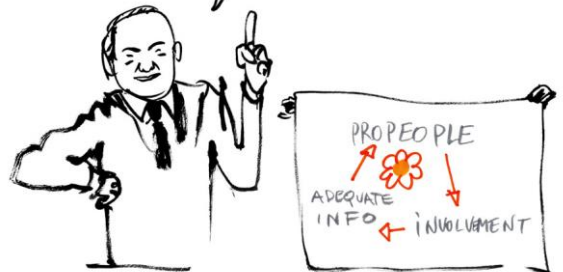

the **ECONOMY** is MORE than just MONEY
→ subsidies must be brought INTO macro-economy

MORE DIALOGUE means
thinking differently · breaking down hierarchies
trying out something more INFORMAL
(a pyjama party for instance?)

I want to introduce: "NHINIT"

A BETTER COMMUNICATION
between scientists & the media

R&Dialogue

WHAT PROSPECTS does the low carbon society give to countries like ROMANIA - (except the prospect to emigrate)?

TESLA -ok. BUT WHAT about the externalized costs?

the energy situation of each member state is way DIFFERENT. The change will not be from today to tomorrow, each member state will have the FREEDOM to determine its own trajectory.

WHAT PROSPECTS does the low carbon society give to countries like ROMANIA - (except the prospect to emigrate)?

TESLA -ok. BUT WHAT about the externalized costs?

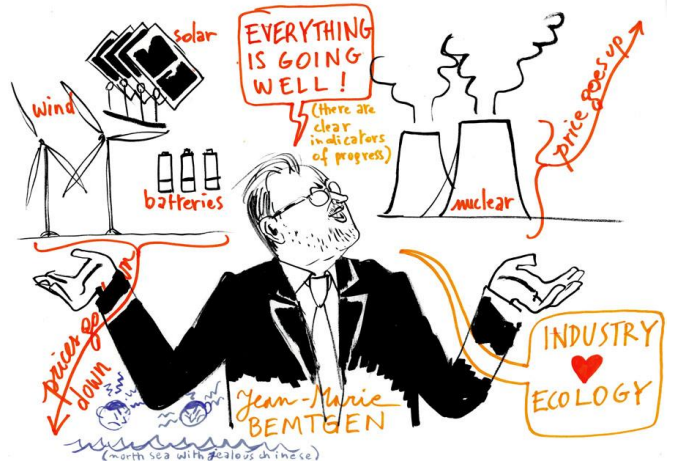

dialogue is also an ADVERSARIAL process

different · opinions · religious views · social positions

Richard Adams.
