Månedlig historie

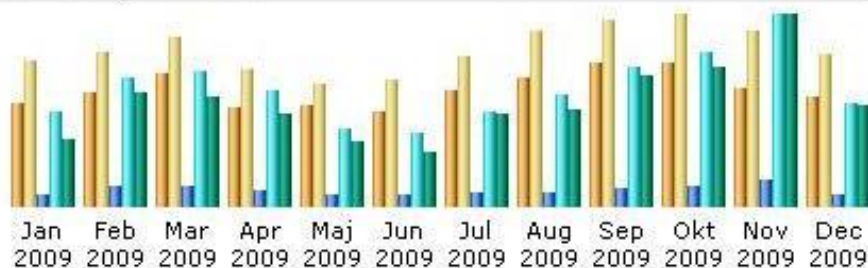

Fig. 9.3 Variation of the visits of the homepage during the year

D9.3 Integration of advice from the advisory board in project.

The advisory board in project worked and brought sound supports in the scattering of the results of the various teams. The interchange between advisory board and researchers mainly took place during the SUN workshops where most of the members of the advisory board were present.

D9.4 Centres of expertise in core areas.

The various countries began to present their results to the local populations, to the technical services and to the local authorities with the aim of intensifying the capacities of the various actors.

One constraint in this aspect is the relatively short duration of the project. As a large part of the research was done by the 20 PhD students in the project, many results did not emerge till after three years, when the PhD had finalised. A continuation of the popularization of the results will, therefore, continue after the project.

A second constraint in this respect was the delay in funding, which meant that the African partners did not have the financial means to conduct all the field visits which had been planned and, therefore, were unable to get as much interaction with local communities as wished. However, the researchers managed to make regular visits, and a strong link between the local communities of the core areas and the research teams now exists.

Some of the core areas, the centre of expertise in the Sun core area, will form the basis for a new project on carbon stocking and carbon sale to the voluntary market through the UNDESERT project.

D9.5 Training courses for students and managers.

Training courses for students and researchers

- PhD course in GIS and ecological niche modelling in Germany: Gerard Gouwakinnou, Laurent Houssou, Blandine Nacoulma, Marcel Koadima, Wenemi François Kagambèga, Lassina Traoré, Julien Avakoudjo, Katharina Schumann, Katrin Jurisch (Konstantin König)
- PhD summerschool including field excursion in Germany: Gerard Gouwakinnou, Laurent Houssou, Blandine Nacoulma, Marcel Koadima, Wenemi François Kagambèga, Lassina Traoré, Julien Avakoudjo, Katharina Schumann, Katrin Jurisch (Rüdiger Wittig, Karen Hahn, Konstantin König)
- PhD exchanges (two times) in Germany: Blandine Nacoulma (Karen Hahn, Yvonne Bachmann, Katharina Schumann)
- Researcher exchange in Germany: Brice Sinsin, Adjima Thiombiano (Rüdiger Wittig, Karen Hahn, Konstantin König)

Training courses for managers and local communities

D9.6 Publication of results in scientific journals.

During the project, 36 publications have been finalised. The resultants of the project were published in 17 scientific journals. The table below gives the number of publications by scientific journal.

Diplomas	Number of publications
Doctorat d'Etat	1
Master Thesis	3
Scientific journals in which articles are published	
<i>Annals of Forest Science</i>	1
<i>Canadian Journal of Forest Research</i>	1
<i>Aktuel Naturvidenskab</i>	1
<i>Bois et Forêts des Tropiques</i>	2
<i>Taxon</i>	1
<i>Africa IUFRO</i>	1
<i>International Journal of Biodiversity and Conservation</i>	1
<i>Remote Sensing</i>	2
Scientific and Technical report	2
<i>Economic Botany</i>	1
<i>Systematics and Conservation of African Plants</i>	3
<i>Remote Sensing of Environment</i>	2
<i>Sécheresse</i>	1
<i>Journal of Forestry Research.</i>	1
<i>Traditional Forest-Related Knowledge and sustainable Forest Management in Africa</i>	1
<i>Tropical Ecology</i>	1
<i>News Letter</i>	1
<i>Remote Sensing Letters</i>	1

Diplomas	Number of publications
<i>Earth and Environmental Science</i>	1
Proceedings, European Geosciences Union Annual Conference	2
Workshop	
Workshop on Global Vegetation Changes	1
Workshop on the analysis of Multitemporal Image data	1
Poster	8
	36

The students pursue the publication of their results. Some publications are still in preparation and some are submitted, but waiting for review.

One constraint is the relatively short duration of the project, as the review process can take a long time and many of the publications are only ready for submission at the end of the PhD study.

D9.7 General publicity about the project.

Several hundred activities of dissemination have been done through oral communication, posters and multimedia at workshops and conferences to the national level in the direction of the students, national researchers and forest technicians and at the international level towards the world scientists and towards the local populations.

Synthesis of dissemination activities
