

Project No: 329908

Project Acronym: OFB-SCI

Final Report

Figure 1

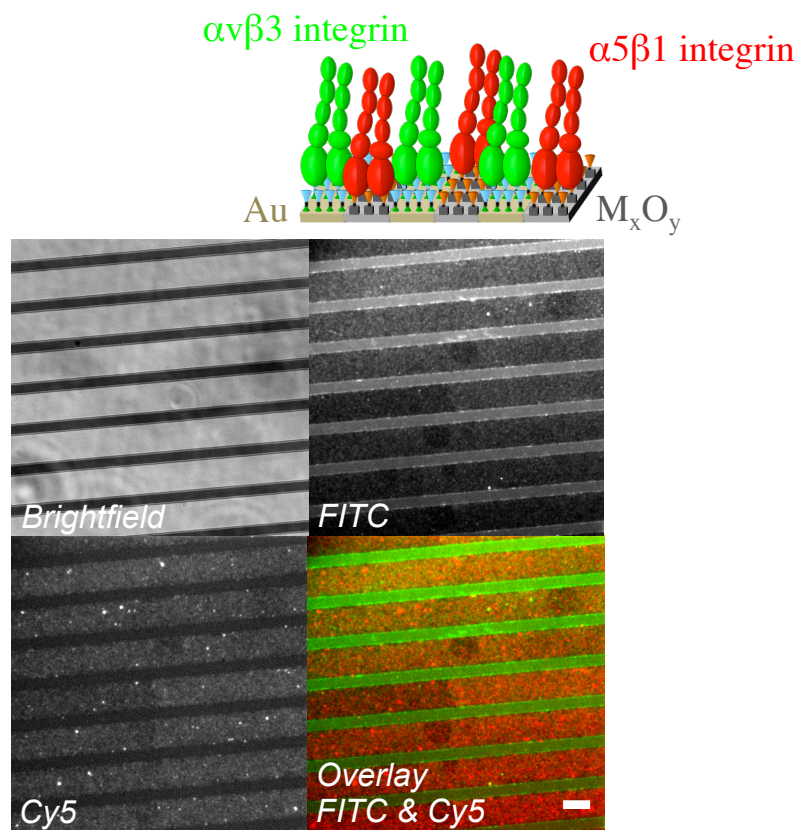

Figure 1. Brightfield and fluorescence images as well as schematic representation of the substrates (not to scale) of the segregation of the immunostained $\alpha\beta3$ and $\alpha5\beta1$ integrins on alternating functionalized Au (thin) and M_xO_y (thick) stripes. $\alpha\beta3$ was tagged with Alexa Fluor 488 conjugated antibodies whereas $\alpha5\beta1$ with Alexa Fluor 647 conjugated antibodies. Scale bars = 10 μm .
