

Project no.  
**518167**  
Project acronym  
**INNOCHEM**

Project title  
**Innovative Chemokine-based Therapeutic Strategies for Autoimmunity and  
Chronic Inflammation**

Instrument: **Integrated Project**

Thematic Priority: **LSH-2004-1.2.4-2**

**Title of report**

**Final report**

Period covered: **November 1<sup>st</sup> 2005- October 31<sup>st</sup> 2010**

Date of preparation: **15<sup>th</sup> December 2010**

Start date of project: **November 1<sup>st</sup> 2005**

**Duration: 60 months**

Project coordinator name: **Alberto Mantovani**

Project coordinator organisation name: **Humànitás Mirasole SpA**

## 1. Project execution

### 1.1 Summary of project objectives

The general objective of INNOCHEM was to develop innovative chemokine-based therapeutic strategies for autoimmunity and chronic inflammation. The programme was based on the scientific excellence of the applicants, which have made major recognized contributions to the field since the very beginning of chemokine discovery, and on the construction of shared technological platforms. This included: **i)** proteomics and **ii)** transcriptional profiling for the outline of the "chemokinome" in pathophysiological conditions and identification of new antagonists; **iii)** molecular modelling of agonist/antagonist receptor or agonist/inhibitor interaction, for pharmacology and drug design; **iv)** gene modified mice for target validation in autoimmune disorders. Genetic, structural, biological, and immunopathological studies provide a framework for the development of innovative chemokine-based therapeutic strategies. The therapeutic approaches investigated were innovative and not limited to conventional antagonists. These included decoy receptors, agonist binders, and non-competitive allosteric inhibitors. In addition to academic groups, therapy-oriented research included 3 biotech SMEs, 1 medium and 1 big Pharma companies. The companies involved developed complementary non-overlapping approaches to target the chemokine system with recombinant and low molecular weight molecules. This programme has re-established the European leadership in basic and applied chemokine research by integrating academic and industrial cutting edge groups to develop innovative therapeutic strategies against autoimmunity and chronic inflammatory disorders.

### 1.3 Work performed and end results (elaborating on the degree to which the objectives were reached; describing the methodologies and approaches employed and relating the achievements of the project to the state-of-the-art)

The INNOCHEM consortium has coordinated most of the research activities on chemokines performed in Europe in the last 5 years, a pivotal role recognized internationally. INNOCHEM has significantly strengthened integration and collaboration among partners of the Consortium and their visibility and recognition outside the Consortium, as certified by the many collaborations established and by the many INNOCHEM fellowships dedicated to exchanges of young

scientists among the Consortium laboratories and with laboratories working on chemokines outside the Consortium, both in the EU and in the USA. The results obtained have been published in high impact peer-reviewed journals, and have significantly contributed in the improvement of our understanding of the chemokine system, as recognised by the scientific community. In particular, the Consortium has strengthened the European leadership in several fields of fundamental research on chemokines, including structure/function activities of chemokines and chemokine-binding proteins, chemokine decoy receptors, pharmacology of chemokines and chemokine receptor antagonists. The Consortium has also performed remarkably well in translating fundamental knowledge, through a number of studies in several preclinical models. New and original strategies to interfere with the chemokine system have been developed, including in particular the identification and structural characterization of natural compounds and the identification and development of the new class of synthetic compounds represented by non-competitive allosteric inhibitors. Finally, the Consortium has also played a major role in translating in the clinical setting, with the definition of pharmacodynamic profiles on two anti-chemokine antibodies, a phase I clinical trial started in 2009, and a phase II placebo-controlled clinical trial concluded in 2010.

#### **1.4 Potential applications**

The INNOCHEM goal was to develop innovative chemokine inhibitors as a novel therapeutic approach for the treatment of autoimmune and chronic inflammatory diseases. Development of innovative therapeutic strategies requires definition of pathophysiological significance and target validation, and for this reason INNOCHEM has strongly supported studies of several fundamental aspects of the chemokine system, which have indeed opened new avenues for the development of innovative approaches beyond conventional receptor antagonists. INNOCHEM has identified endogenous mechanisms controlling the chemokine system, including most of the evidence of biological relevance of post-translational modifications, agonist cooperation, receptor oligomerization, ligand scavenging by decoy receptors, ligand transcytosis. All these regulatory mechanisms represent new potential aspects to be exploited for an innovative approach aimed at controlling chemokines to interfere with the natural history of a wide range of human diseases. INNOCHEM has also identified and characterized exogenous tools able to interfere with the chemokine system. These include on the ligand side anti-chemokine antibodies and synthetic agents able to interfere with chemokine production, on the receptor side natural compounds and the new class of allosteric receptor inhibitors. Finally, for several of these agents INNOCHEM has provided the needed support for transfer in the clinical setting. A phase I clinical study has been designed and started with meraxin, an new allosteric dual CXCR1/CXCR2 inhibitor developed on the basis of previous knowledge acquired by extensive investigation of the first chemokine receptor allosteric inhibitor reparixin. In addition, a phase II placebo-controlled clinical trial of the chemokine synthesis inhibitor bindarit in diabetic nephropathy patients has been completed. Results obtained in this project have opened new perspectives in the therapeutic intervention against autoimmunity and chronic inflammation, with social impacts measurable as improved health, and reduction of health societal costs, including costs for patient assistance as well as loss of manpower.

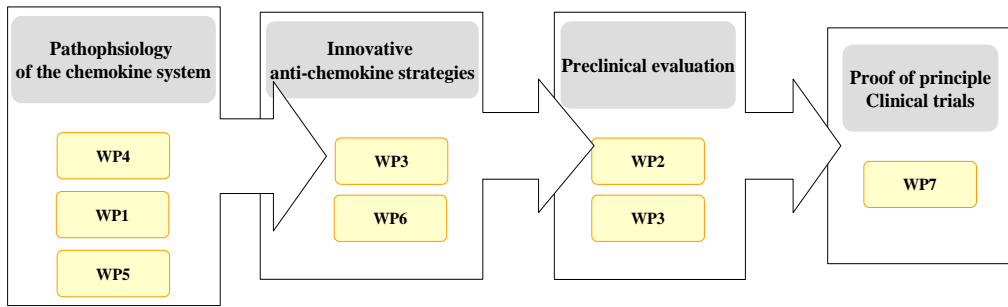

#### **1.5 Impact of the project (on its industry or research sector)**

Autoimmune/chronic inflammation disorders usually entail therapy with immunosuppressive medications that slow or suppress the immune system response in an attempt to stop the inflammation involved in the disease. Unfortunately, these medications also suppress the ability of the immune system to fight infection and have other potentially serious side effects. Therefore, a great effort of medical science is directed to find new therapies for the treatment of autoimmune and inflammatory diseases and that also improve the safety of human population. The goal of INNOCHEM project was the evaluation of the chemokine system as a new therapeutic target and the development of innovative approaches for its control. During its activity, INNOCHEM has generated a significant amount of preclinical data clearly showing that chemokines and their receptors are key players in a number of autoimmune/chronic inflammation disorders and indicating which specific molecules play central roles in driving different diseases. INNOCHEM also has identified innovative approaches to control this complex molecular system, each representing a new avenue of potential industrial interest. In addition, because of the tight interaction among the partners participating to the INNOCHEM project and of the novelty of some technological approaches, the proposed studies has also created new opportunities for education and training of young investigators. The proposed study has offered the opportunity to import technical skill and scientific knowledge in the fields of chemokine research in the different partner countries. This has been an input for the formation of young researchers and for the development of analogous projects with application to different targets. It is assumed that all this can result in new opportunities of employment in Europe.

INNOCHEM pipeline

INNOCHEM output

INNOCHEM final meeting, Berlin, October 11-13, 2010

2 Dissemination and use

Annex 1 – Plan for using and disseminating the knowledge

Section 1 - Exploitable knowledge and its Use

Exploitable Knowledge (description)	Exploitable product(s) or measure(s)	Sector(s) of application	Timetable for commercial use	Patents or other IPR protection	Owner & Other Partner(s) involved
Chemokine mutants acting as chemokine antagonists		Inflammation	10 years	0511	Partner 21
Novel antagonists of cxcr3- binding cxc chemokines		Inflammation	10 years	0513	Partner 21
CC-chemokine mutants against liver diseases		Inflammation	10 years	0801	Partner 21
Novel CC-chemokine-binding tick proteins		Inflammation	10 years	0956	Partner 21
Novel CC-chemokine antagonists		Inflammation	10 years	1015	Partner 21
Chemokine-Mucin-GPI Anchored Proteins as Tumor Adjuvants and in Wound Repair		Cancer therapy and wound repair	10 years	Patent Ludwig-Maximilians-University-University, Munich	Partner 9
Use of Filamin A inhibitors to elaborate pharmaceutical compositions, inhibitory compounds of such activity and their therapeutic applications and procedures to identify those inhibitory compounds		Inflammation	10 years	200602494	Partner 7
Novel chemokine-binding peptibodies capable of inhibiting the course of autoimmunity, inflammation and cancer		Inflammation	10 years		Partner 16

## Section 2 – Dissemination of knowledge

### First Year

Planned/actual Dates	Type	Type of audience	Countries addressed	Size of audience	Partner responsible /involved
Milan, November 20-22 2005	Kick-off meeting	Scientists	EU	All consortium and EU Commission	1, 2 and 22
Overall period	Direct e-mailing	Scientists		All consortium	All participants
Bellinzona, October 2-4 <sup>th</sup> , 2006	Annual meeting	Scientists	EU	All consortium and EU Commission	1 and 2
Overall period	Publications	Scientists	Worldwide		All partners
Overall period	Seminars and Conferences	Scientists	Worldwide		All partners

### Second Year

Planned/actual Dates	Type	Type of audience	Countries addressed	Size of audience	Partner responsible /involved
Milan, November 20-22, 2005	Kick-off meeting	Scientists	EU	All consortium and EU Commission	1, 2 and 22
Overall period	Direct e-mailing	Scientists		All consortium	All participants
Bellinzona, October 2-4, 2006	Annual meeting	Scientists	EU	All consortium, Scientific Advisory Board, and coordinator of MUGEN	1 and 2
2006	Press releases on Radio, Press, Television	Non specialistic Public	Switzerland and Italy		1 and 2
Madrid September 24-26, 2007	Annual course	Young scientists and students	EU, Brasil	40	1,2,7
San Lorenzo de El Escorial, Madrid September 27-29, 2007	Annual meeting	Scientists	EU, Brasil, USA	All Consortium members, EU Commission, Scientific Advisory Board, and coordinator of MAIN	7, 1, 2
Overall period	Publications	Scientists	Worldwide		All partners
Overall period	Seminars and Conferences	Scientists	Worldwide		All partners

### Third year

**Fifth year**

<b>Event Date and Location</b>	<b>Type</b>	<b>Audience</b>	<b>Countries addressed</b>	<b>Partner(s) involved</b>
Generation and preclinical development of a fully human anti-CXCL10 monoclonal antibody Hermenonville, France, April 2009	INNOCHEM 2009	Scientists	Worldwide	Partner 29
Engineering Antibodies For Targeting Redundant Signaling Pathways in Autoimmunity Beijing, China May 2009	International Cooperative alliance	Scientists	Worldwide	Partner 29
Chemokines and their role in inflammatory pathologies Bristol, UK July 2009	British Society of Immunology Meeting	Scientists	National	Partner 26
The D6 chemokine decoy receptor coordinates innate and adaptive immune responses Birmingham, UK August 2009	Microanatomy of the Immune Response Meeting	Scientists	Worldwide	Partner 26
Chemokines and in vivo trafficking of progenitor cells Istituto Clinico Humanitas, Milan, Italy October 2009	Invited seminar	Scientists	National	Partner 15
Chemokines and in vivo trafficking of progenitor cells Institute for Research in Biomedicine, Bellinzona, Switzerland October 2009	Invited seminar	Scientists	National	Partner 15
Chemokines and in vivo trafficking of progenitor cells Stem cell workshop Imperial College, London, UK October, 2009	Workshop	Scientists	National	Partner 15
Inflammatory chemokines in monocyte mobilisation Vina del mar, Chili November 2009	ImmunoChile 2009	Scientists	National	Partner 3
Inflammatory chemokines in monocyte mobilisation Academia Nacional de Medicina, Buenos Aires, Argentina November 2009	Scientific meeting	Scientists	National	Partner 3
Human gd T cells: novel tools for cellular immunotherapy Bristol, UK November 20, 2009	1 <sup>st</sup> SARTRE Meeting, Bristol	Scientists	National	Partner 25

Master lectures Alcalá University November 2009	Lecture	Master/PhD students	National	Partner 7
Master lectures ETSI telecomunicacion November 2009	Lecture	Master/PhD students	National	Partner 7
Increasing complexity of GPCR complexes and signaling networks Paris, France November 24, 2009	ESF Exploratory Workshop on "GPCR signalling systems: A new avenue for drug discovery ?"	Scientists	Worldwide	Partner 10
Chemokines and in vivo trafficking of progenitor cells Vascular Biology Meeting, Imperial College, London December 2009	Meeting	Scientists	National	Partner 15
Lecture to high school pupils Glasgow December 2009	lecture	High school pupils	National	Partner 26
Master lectures Centro Nacional de Biotecnologia December 2009	Lecture	Master/PhD students	National	Partner 7
Lecture to medical students Cardiff University December 04, 2009	Lecture	Medical students	National	Partner 25
Chemokines and in vivo trafficking of progenitor cells The Association for Science Education annual meeting, Nottingham, UK January 2010	Lecture "Stem cells the future of medicine"	Scientists	National	Partner 15
Chemokines and chemokine receptors in health and disease Amsterdam, The Netherlands January 2010	Amsterdam Doctoral Training Programme	Masters/ PhD students	National	Partner 26
Master lectures Autonomous University January 2010	Lecture	Master/PhD students	National	Partner 7
Synergy-inducing chemokines Institute of Oncology of Southern Switzerland, Bellinzona, CH, January 13, 2010	Seminar	Scientists	National	Partner 2
Lecture to medical students Cardiff University January 19, 2010	Lecture	Medical students	National	Partner 25
Master lectures National Center for Oncology Research February 2010	Lecture	Master/PhD students	National	Partner 7
Chemokines and in vivo	Seminar	Scientists	National	Partner 15

trafficking of progenitor cells SMi conference – Stem cells: Achieving success in science and commercialisation, London February 2010				
Master lectures Alcalá University February 2010	Lecture	Master/PhD students	National	Partner 7
Lecture to medical students Cardiff University February 22, 2010	Lecture	Medical students	National	Partner 25
Chemokines and in vivo trafficking of progenitor cells Stem Cell Club, Birmingham, UK February 2010	Seminar	Scientists	National	Partner 15
Expression of angiostatic CXCL4L1 counterbalances angiogenic impulses of VEGF, CXCL8 and CXCL12 Brussels, Belgium, February 5, 2010	Inter-Universitary Attract Pole (IAP/PAI) meeting	Scientists	Worldwide	Partner 14
Expression and function of GILZ in dendritic cells and macrophages Department for Molecular Biomedical Research, Flanders Institute for Biotechnology (VIB), Ghent, Belgium February 5, 2010	Seminar	Scientists	National	Partner 4
Chemokines and in vivo trafficking of progenitor cells Genes, Development and Disease Theme Seminar at UCL-ICH, London February 2010	Invited seminar	Scientists	National	Partner 15
Human antigen-presenting gd T cells Birmingham University, February 05, 2010	Cancer Immunotherapy Group	Scientists	Worldwide	Partner 25
Statins as immunomodulatory drugs in murine models of inflammation National Center for Cardiovascular Research. CNIC. Madrid. Spain March 01, 2010	MEICA Workshop	Scientists	National	Partner 7
Functional chemokine receptor responses EPFL Lausanne, Switzerland March 02, 2010	Seminar	Scientists	Worldwide	Partner 2
Chemokines and in vivo trafficking of progenitor cells Keynote address -Heart Lung Fest, Vancouver March 2010	Seminar	Scientists	Worldwide	Partner 15
Chemokines and in vivo trafficking of progenitor cells Tissue Engineering Institute, Porto, Portugal	Invited Seminar	Scientists	National	Partner 15

March 2010				
Synergy-inducing chemokines Bellinzona, CH, March 18, 2010	IRB – INGM joint meeting	Scientists	Worldwide	Partner 2
Citrullination affects the biological activity of chemokines St. Sorlin d'Arves – France, March 22-24, 2010	International workshop on "Cytokines and Chemokines"	Scientists	Worldwide	Partner 14
Generation and preclinical development of a fully human anti-CXCL10 monoclonal antibody St. Sorlin d'Arves – France, March 22-24, 2010	Cytokines and Chemokines-Post-transcriptional regulation.	Scientists	Worldwide	Partner 29
CXCR7 functions as a scavenger for CXCL12 St. Sorlin d'Arves – France, March 22-24, 2010	International workshop on "Cytokines and Chemokines"	Scientists	Worldwide	Partner 2
The COOH-terminal peptide of platelet factor-4 variant (CXCL4L1/PF-4var <sup>47-70</sup> ) strongly inhibits angiogenesis St. Sorlin d'Arves – France, March 22-24, 2010	International workshop on "Cytokines and Chemokines"	Scientists	Worldwide	Partner 14
The D6 chemokine decoy receptor coordinates innate and adaptive immune responses St. Sorlin d'Arves – France, March 22-24, 2010	International workshop on "Cytokines and Chemokines"	Scientists	Worldwide	Partner 26
HMGB1 synergises with CXCL12, St. Sorlin d'Arves – France, March 22, 2010	International workshop on "Cytokines and Chemokines"	Scientists	Worldwide	Partner2
Function and Transcriptional Regulation of Differentiation of Follicular T Helper (T <sub>FH</sub> ) Cells Würzburg, Germany, March 2010	Seminar	Scientists	National	Partner 6
Mouse ChemR23 is expressed in dendritic cell subsets and macrophages, and mediates an anti-inflammatory activity of chemerin in a lung disease model Davos, Switzerland March 29- April 01, 2010	World Immune Regulation Meeting	Scientists	Worldwide	Partner 10
Regulation of SOD3 by statins Centro de Investigaciones Biológicas. Madrid. Spain April 19, 2010	2nd Scientific Journey of the Spanish Network for Rheumatic Diseases	Scientists	National	Partner 7
The role of conserved regions in chemokine receptors for ligand-binding and receptor activation Breckenridge, USA April 2010	G protein-coupled receptors, a Keystone meeting	Scientists	Worldwide	Partner 13
A chimeric approach to study chemokine receptor activation Breckenridge, USA	G protein-coupled receptors, a Keystone meeting	Scientists	Worldwide	Partner 13

April 2010				
Inflammatory chemokines in monocyte mobilisation Il Ciocco, Italy May 2010	The Gordon Resarch Conference	Scientists	Worldwide	Partner 3
Artritis reumatoide: Una enfermedad autoinmune Madrid, Spain, May 2010	Curso de formación de Monitores Clínicos Quintiles	Scientists	National	Partner 7
Human gd T-APCs: an update Kiel, Germany, May 19-21, 2010	Int. gd T Cell Conference	Scientists	Worldwide	Partner 25
Function of chemokine decoy receptors in tuning the immune response Sylt, Germany, May 06-09, 2010	Forefronts Symposium (Int. Society of Nephrology)	Scientists	Worldwide	Partner 2
Effect of bindarit in a porcine coronary artery model of vascular restenosis Il Ciocco, Italy May 30 – June 4, 2010	The Gordon Resarch Conference	Scientists	Worldwide	Partner 28
Inflammatory chemokines in monocyte mobilisation Il Ciocco, Italy May 30 – June 4, 2010	The Gordon Resarch Conference	Scientists	Worldwide	Partner 9
Generation and early clinical development of a fully human anti-CXCL10 monoclonal antibody Il Ciocco, Italy May 30 – June 4, 2010	The Gordon Resarch Conference	Scientists	Worldwide	Partner 29
The Yin Yang of CXCR7 functions Il Ciocco, Italy May 30 – June 4, 2010	The Gordon Resarch Conference	Scientists	Worldwide	Partner 2
The carboxy-terminal peptide of platelet factor-4 variant (CXCL4L1/PF-4var <sup>47-70</sup> ) Leuven, Belgium, May 27, 2010	Oncoforum	Scientists	Worldwide	Partner 14
Citrullination of chemokines as a regulatory mechanism for biological activity Il Ciocco, Italy, May 30 – June 4, 2010	Gordon Research Conference “Chemotactic Cytokines”	Scientists	Worldwide	Partner 14
Chemokines and in vivo trafficking of progenitor cells Il Ciocco, Italy, May 30 – June 4, 2010	Gordon Research Conference “Chemotactic Cytokines”	Scientists	Worldwide	Partner 15
Chair’s introductory remarks Il Ciocco, Italy, May 30 – June 4, 2010	Gordon Research Conference “Chemotactic Cytokines”	Scientists	Worldwide	Partner 26
Chemerin and ChemR23 in inflammatory and viral diseases Il Ciocco, Italy, May 30 – June 4, 2010	Gordon Research Conference “Chemotactic Cytokines”	Scientists	Worldwide	Partner 10
PhD-course- Pharmacology now and in the future	course	Scientists	National	Partner 13

Copenhagen University, Denmark, May 2010				
“Pharmacologically characterization of functionally selective CXCR inhibitors” Camerino, Italy, May 16-20, 2010	28 <sup>th</sup> Camerino- Cyprus- Noordwijkerhout Symposium “Trekking through Receptor Chemistry”	Scientists	Worldwide	Partner 23
Papel de SOCS1 como supresor tumoral Universidad de Alcalá May 2010	Seminarios externos Departamento de Fisiología.	Scientists	National	Partner 7
Bindarit an inhibitor of MCPs synthesis: history & perspectives Siena, Italy, June 04-06, 2010	INNOCHEM course 2010	Scientists	Worldwide	Partner 28
Chemokines and in vivo trafficking of progenitor cells BHF Centre for Excellence Symposium, Imperial, London June 2010	Seminar	Scientists	National	Partner 15
Master lectures Quintiles SL June 2010	Lecture	Master/PhD students	National	Partner 7
Inflammatory chemokines in monocyte mobilisation French Society of Biology France June 2010	Seminar	Scientists	National	Partner 3
The D6 chemokine decoy receptor coordinates innate and adaptive immune responses June 2010	Immunology Meeting	Scientists	Worldwide	Partner 26
The Yin Yang of Chemokine Receptor Functions University of Bern, Switzerland July 07, 2010	Seminar	Scientists	Worldwide	Partner 2
Activation and inactivation of chemokine receptors Copenhagen, Denmark July 2010	WorldPharma2010	Scientists	Worldwide	Partner 13
A chimeric approach to study chemokine receptor activation Copenhagen, denmark July 2010	WorldPharma2010	Scientists	Worldwide	Partner 13
The Yin Yang of Chemokine Receptor Functions Novartis, Basel, Switzerland July 08, 2010	Seminar	Scientists	Worldwide	Partner 2
Human gd T-APCs: an overview London, UK July 13, 2010	UCL Child Health Science Seminar series	Scientists	Worldwide	Partner 25
The Yin Yang of Chemokine Receptor Functions University of Geneva, Switzerland July 21, 2010	Seminar	Scientists	Worldwide	Partner 2

Exhibit “Tra l’ombra e la luce” – “Between shadow and light” Bellinzona, CH, July 14 – August 22, 2010	Photographic (poverty-related diseases) and didactic (“The Birth of the Immunology”) exhibition	General Public	Bellinzona and Bellinzona visitors	Partner 2
Chemokines and in vivo trafficking of progenitor cells Stem cell workshop Imperial College, London, UK July and August 2010	Workshop	Scientists	National	Partner 15
PhD-course in grant-application and research reports Copenhagen University, Denmark, August 2010	course	Scientists	National	Partner 13
CXCR5-directed Immunotherapy of B cell Non-Hodgkin lymphoma and autoimmune disease Kobe, Japan, August 2010	14 <sup>th</sup> International Congress of Immunology	Scientists	Worldwide	Partner 6
Bindarit, an inhibitor of monocyte chemotactic proteins (MCPs) production, reduces restenosis in a porcine coronary stent model Stoccolm, Sweden August 30, 2010	ESC 2010	Scientists	World wide	Partner 29
CCL2 synthesis inhibitors modulate inflammatory and neuropathic pain behaviour in rats Montreal, Canada September 02, 2010	13 <sup>th</sup> World Conference on pain	Scientists	Worldwide	Partner 28
EBI2-an orphan 7TM receptors involved in EBV pathogenesis Birmingham, UK, September 2010	Epstein-Barr virus conference	Scientists	Worldwide	Partner 13
Chemokines and in vivo trafficking of progenitor cells European Respiratory Society, Barcelona, Spain September 2010	Invited seminar	Scientists	National	Partner 15
Chemokine Receptor Functions University of Münster, Germany, September 08, 2010	Seminar	Scientists	Worldwide	Partner 2
Cytokines/ Chemokines Leuven, Belgium, September 17, 2010	Symposium on Chronic Inflammatory Bowel Diseases	Scientists	Worldwide	Partner 14
CXCR5 as Therapeutic Target in B cell Non-Hodgkin lymphoma and autoimmune diseases Leipzig, Germany, September 2010	40 <sup>th</sup> Annual Meeting German Society for Immunology	Scientists	Worldwide	Partner 6
Chemokines in pathology Berlin, Germany, October 11-13, 2010	V INNOCHEM annual meeting	Scientists	Worldwide	Partner 2

WP5 Progress Report Berlin, Germany October 11-13, 2010	Final INNOCHEM meeting	Scientists	Worldwide	Partner 25
Signalling pathways in stem cell biology, Ulm, Germany October 2010	Seminar	Scientists	Worldwide	Partner 15
Chemokines and in vivo trafficking of progenitor cells SFB 497 Symposium, Ulm Germany October 2010	Invited seminar	Scientists	National	Partner 15
Generation and preclinical development of a fully human anti-CCL5 monoclonal antibody. Chicago, USA October 2010	8th joint Meeting of the International Cytokine Society (ICS) and the International Society for Interferon and Cytokine Research (ISICR)	Scientists	Worldwide	Partner 29

### Section 3 - Publishable results

During the course of the project the following publications were made:

1. Abu El-Asrar, A.M., S.Struyf, D.Kangave, K.Geboes, and J.Van Damme. 2006. Chemokines in proliferative diabetic retinopathy and proliferative vitreoretinopathy. *Eur. Cytokine Netw.* 17:155-165.
2. Bizzarri, C., A.R.Beccari, R.Bertini, M.R.Cavicchia, S.Giorgini, and M.Allegretti. 2006. ELR+ CXC chemokines and their receptors (CXC chemokine receptor 1 and CXC chemokine receptor 2) as new therapeutic targets. *Pharmacol. Ther.* 112:139-149.
3. Bottazzi, B., C.Garlanda, G.Salvatori, P.Jeannin, A.Manfredi, and A.Mantovani. 2006. Pentraxins as a key component of innate immunity. *Curr. Opin. Immunol.* 18:10-15.
