

MS6 Results of individual clinical vaccine trials

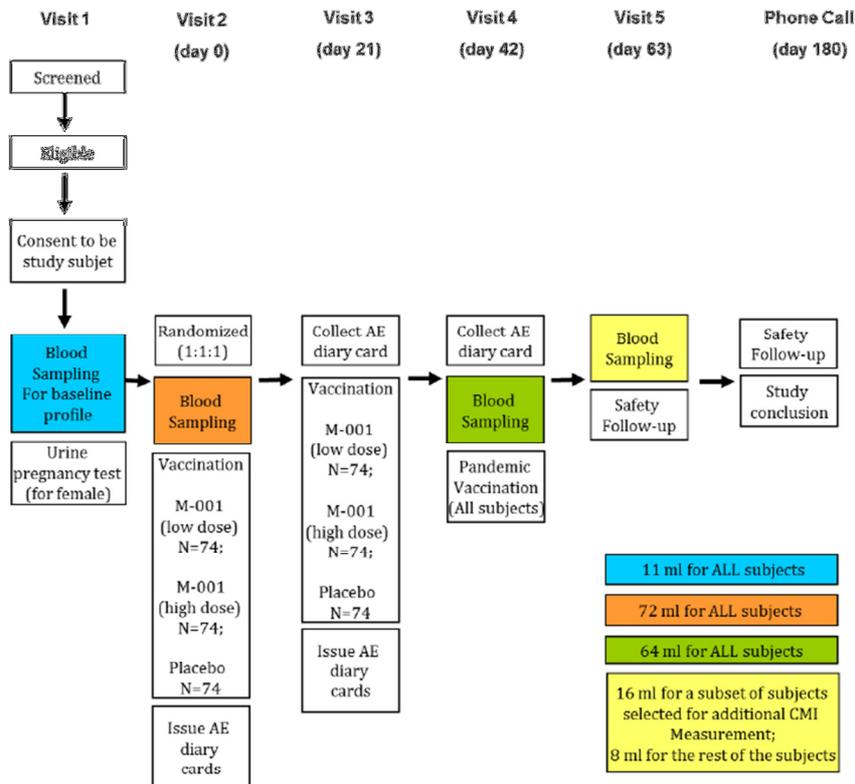

SEEK trial

The SEEK trial has obtained ethical and competent authority approval in June and July 2016, respectively. A site initiation visit was performed at August 16th 2016. Screening visits started on 22nd August 2016. 96 subjects had been randomized by the end of September.

BiondVax trial

The visits for all subjects for the BiondVax trial are completed. In total 225 subjects have been randomized, among those only 6 withdrew during the study period. In the end 219 subjects completed the study at October 4th 2016. Monitoring visits have also been completed. Data cleaning has been started. RKI has started the laboratory assessments in September 2016. Final data lock of all files can be expected as soon as all data including the laboratory data is complete. This final data lock is expected in December 2016. Data analysis and report are planned in January-March 2017.

On-site visits 2 – 5 can take place at the indicated date + 2 days. Study conclusion phone call (Day 180) can take place at the indicated date ± 2 days.
