9th EASN International Conference on Innovation in Aviation & Space

The EASN Association, the University of Patras and the National Technical University of Athens are inviting you to the 9th EASN International Conference on “Innovation in Aviation & Space” which will take place in Athens, Greece from the 3rd until the 6th of September, 2019.

📅 3 September 2019 - 6 September 2019
📍 Greece

The Aviation & Space sector is of paramount importance for Europe’s industrial competitiveness. While the sector invests heavily in research and innovation (the cornerstone of Europe’s knowledge economy), we strongly believe that such events support the community to continue achieving milestones. The 9th EASN International Conference will give the opportunity to scientists and researchers from all over the world to present their recent achievements in a series of thematic sessions, organized by internationally recognized scientists.

The 9th EASN International Conference is the successor of the EASN International Conference which was held in Warsaw, Poland between 26th and 29th of September 2017 and gathered more than 300 participants, scientists and representatives of the European Aviation community, including industry and research establishments. The scientific work of the participants is published in accredited Open Access publishers i.e. MATEC Web of Conferences, whilst a number of selected papers is be published
in international journals following peer review.

Like its predecessors, the 9th EASN International Conference is expected to be a major European Dissemination and Exploitation event of Aviation & Space-related research, while in parallel it will act as a forum where innovative ideas, breakthrough concepts and disruptive technologies are presented.
