Project description

Evaluating European media-related risks

The surge of populist and ultra-right tendencies in European countries poses growing challenges for unity and common European goals as well as informed decision-making. We need to safeguard deliberative communication in media, where different views and arguments are met with respect and tolerance. For this, however, a holistic attitude towards media-related risks and opportunities (ROs), research and prognosis of future possible threats is needed. The EU-funded MEDIADELCOM project will develop a diagnostic tool for media, educators and related institutions that enables ROs evaluation for deliberative communication and social cohesion in Europe. It will enable modelling and management of multiple scenarios and instruments for media-related risks prediction.
