Project description

A shared resource for literary scholars working digitally

The digital age offers challenges and opportunities for completing research on Europe’s multilingual and interconnected literary heritage. Even though many resources are currently available in digital libraries, a lack of standardisation hinders their access and reuse. The EU-funded CLS INFRA project will help build the shared and sustainable infrastructure needed to undertake literary studies in the digital age. The project will align these diverse resources with each other, with the tools needed to interrogate them, and with a widened base of users. The resulting improvements will benefit researchers by bridging gaps between greater and lesser-resourced communities in computational literary studies and beyond, ultimately offering
opportunities to create new research and insight into our shared and varied European cultural heritage.
