Europe joins forces to tackle COVID-19

Convalescent plasma (CP) from recovered COVID-19 patients is being considered as a potential treatment. The EU-funded SUPPORT-E project aims to support high quality clinical evaluation of COVID-19 CP as well as data collection and analysis. It also strives to improve CP potency assessment, develop evidence-based recommendations on the appropriate use of CP for the treatment of COVID-19 across EU Member States and promote best practices regarding CP collection and use in the current health crisis as well as in subsequent crises involving novel
pathogens. By bringing together major European blood establishments with world leading research capabilities, SUPPORT-E constitutes the first EU coordinated research effort to support high quality clinical and scientific evaluation of COVID-19 CP.

**Fields of science**

medical and health sciences > health sciences > infectious diseases > RNA viruses > coronaviruses

medical and health sciences > basic medicine > pharmacology and pharmacy > pharmaceutical drugs > vaccines

medical and health sciences > basic medicine > immunology > immunotherapy

medical and health sciences > basic medicine > pharmacology and pharmacy > pharmaceutical drugs > antivirals

**Keywords**

Coronavirus  COVID-19  SARS-CoV-2  convalescent plasma

plasma potency  passive immunotherapy

**Programme(s)**

H2020-EU.3.1. - SOCIETAL CHALLENGES - Health, demographic change and well-being

MAIN PROGRAMME

H2020-EU.3.1.3. - Treating and managing disease

**Topic(s)**

IBA-SC1-CORONAVIRUS-2020-3 - Advancing knowledge for the clinical and public health response to the 2019-nCoV epidemic

**Call for proposal**

H2020-IBA-SC1-CORONAVIRUS-2020-3
