Project description

Providing the first systematic examination of philosophical conceptions of truth

What is truth is a concept at the heart of science, ethics and our everyday lives. The EU-funded TAMP project will study the origins, motivations, and challenges faced by conceptions of truth in ancient and medieval philosophy and how these challenges led to the development of alternative theories of truth. The work of the project will provide a greater insight into a rich but often neglected period of philosophy as well as a better understanding of the concept across the Greek, Arabic and Latin traditions.
