The City Rising: Inequality and Mobility in a Growing Metropolis of the 19th Century

Fact Sheet

Project Information

CityRising
Grant agreement ID: 101044546

DOI
10.3030/101044546

Funded under
European Research Council (ERC)

Total cost
€ 1 956 434,00

EU contribution
€ 1 956 434,00

Coordinated by
LUDWIG-MAXIMILIANS-UNIVERSITAET MUENCHEN
Germany

Project description

A closer look at the growth of Munich in the 19th century

The German city of Munich – like many other industrial metropolises of the 19th century – was faced with the new technologies, the integration of new immigrants, and the threat of epidemics. Bearing all this in mind, the ERC-funded CityRising project will study how Munich dealt with the consequences of a technological shock like the introduction of mass transportation. It will also show how occupations and businesses were subject to differential agglomeration forces. The project will also study how members of a long marginalised Jewish community were integrated into the growing city, and how they rose to the ranks of the educated upper middle classes. The provision of health amenities like sanitation facilities will also be studied.
Fields of science

- social sciences > sociology > demography > mortality
- social sciences > sociology > demography > fertility
- social sciences > sociology > demography > human migrations
- social sciences > economics and business > economics > political economy
- social sciences > social geography

Programme(s)

HORIZON.1.1 - European Research Council (ERC)
