Exploring human rights in the digital age

The same rights that people have offline must also be protected online, according to the UN Human Rights Council. Online human rights include everything from online privacy to online access, data portability and algorithmic discrimination prevention. However, what do traditional rights like privacy mean when real-time social sharing and ubiquitous data collection is the norm? And can existing rights fully capture the new needs and expectations of online users? The ERC-funded DigitalHRGeneration3 project will explore different strategies developed in the digital age within and outside international human rights law to respond to interpersonal interactions and social activities online. Specifically, it will study the evolution of
digital human rights, and explore the protection gaps, overlaps and conflicts across traditional and digital human rights.

Fields of science

social sciences > sociology > governance
natural sciences > computer and information sciences > internet
social sciences > law > human rights > human rights law

Programme(s)

HORIZON.1.1 - European Research Council (ERC)

Topic(s)

ERC-2021-ADG - ERC ADVANCED GRANTS

Call for proposal

ERC-2021-ADG
