Project description

A Europe-wide ecosystem of Open Science

The field of FAIR (findable, accessible, interoperable, re-usable) data principles and open data is important for today’s researchers. Collecting, processing, and analysing data are important activities for every researcher. To assist them, Competence Centres (CCs) bring together open science (OS) and European Open Science Cloud (EOSC) activities in order to provide the expertise available within research institutions, and universities. CCs deliver training and support. The EU-funded Skills4EOSC project aims to unify the existing training landscape into a common and trusted pan-European ecosystem of CCs on OS and data, to accelerate the upskilling
