Project description

A comprehensive study of the pre-modern approaches of tides

Cosmological discussions in pre-modern Europe were influenced by the ebb and flow of tides. During the Scientific Revolution, there was intense competition among the most prominent scholars of astronomy and mathematics, resulting in a significant number of works on tides. The aim was to provide valid arguments in support of their respective cosmological theories. Several recent studies have focussed on pre-modern views of the nature of tides, particularly in relation to various types of calamities. The EU-funded TIDES project will produce the first comprehensive study of pre-modern engagement with the natural phenomenon of tides in their...
