Project description

Enhancing Physical Education Stakeholders’ Policy Capacity

Physical education (PE) develops healthy and active citizens who support sustainable development. However, quality PE provision is in decline globally due to physical educators’ suboptimal preparation for policy engagement. The Marie Skłodowska-Curie Actions (MSCA) PEP-4-QPE project will address the need to build PE stakeholders’ capacity to engage with policy. The project will identify key facilitators, barriers, and content for policy capacity development; transform complicated policy processes into practical policy lessons; and develop an evidence-based, internationally applicable preparatory policy engagement programme for quality PE, available as an open educational resource. PEP-4-QPE will involve
international PE stakeholders in co-design, co-creation, and co-assessment citizen science through a modified e-Delphi approach, participatory research, and case study.
