France

Project description

Understanding climate-induced migration from a gender perspective

The EU-funded GENDEREDCLIMATEMIG project explores climate-induced migration from a gendered perspective and using an interdisciplinary, comparative and participatory methodology. It seeks to shed light on a phenomenon that remains invisible within administrative and statistical categories available to date. As climate-
related causes are often difficult to isolate, research needs to explore the relative weight of climate-related events in migratory trajectories. With case studies conducted in three middle-income countries and regional migration hubs - Malaysia, Mexico and Morocco - this project explores the decision-making processes and experiences of those on the move in the context of climate change. The project also entails a gender-sensitive inquiry into the current state of climate migration governance at international and national levels.

**Fields of science**

- social sciences > sociology > governance
- natural sciences > earth and related environmental sciences > atmospheric sciences > climatology > climatic changes
- social sciences > sociology > demography > human migrations

**Keywords**

- Migration
- Gender
- Climate change

**Programme(s)**

- HORIZON.1.1 - European Research Council (ERC) - MAIN PROGRAMME

**Topic(s)**

- ERC-2022-STG - ERC STARTING GRANTS

**Call for proposal**

- ERC-2022-STG

[See other projects for this call](#)

**Funding Scheme**

- HORIZON-ERC - HORIZON ERC Grants
