Project description

The impact of raising a disabled child

The effects of raising a disabled child can be numerous and varied, and affect the entire family household. In Europe, approximately 4 % of children have various disabilities, and about a million of them attend special schools. However, there is a lack of research that summarises the challenges and processes of families with disabled children. The EU-funded Frailife project aims to fill this crucial gap by using a comparative and population approach to unveil heterogeneous effects, family outcomes and pathways, short- and long-term effects, mechanisms and causalities. This project will allow for an analysis of the general functionality of families with disabled children to inform better policies of the most fragile families in European society.
Fields of science

social sciences > sociology > demography

Keywords

Family  Child disability  Life Course  Demography

Programme(s)

HORIZON.1.1 - European Research Council (ERC)  MAIN PROGRAMME

Topic(s)

ERC-2022-STG - ERC STARTING GRANTS

Call for proposal

ERC-2022-STG
