Project description

Developing and teaching linguistic methodology

In Europe, there is a recognised gap in accessing expertise, training, and research funding in linguistics. Addressing this, is the EU-funded MEDAL project. Using a horizontal, network approach to engage a new generation of researchers, the project aims to develop the competences of all project partners in linguistic methods. The idea is to build better methodological expertise and awareness among the next generation of researchers. The methods the project will use are corpus studies, experimental methods, and computational modelling. Project work will lead to internal expertise, and a sustainable joint training and research programme, amongst other key results.
Keywords

- linguistic methods
- training
- corpus linguistics
- experimental linguistics
- computational modelling
- Linguistics research excellence hub for Northern Europe

Programme(s)

- HORIZON.4.1 - Widening participation and spreading excellence
- HORIZON.4.1.2 - Twinning

Topic(s)

- HORIZON-WIDERA-2021-ACCESS-03-01 - Twinning

Call for proposal

- HORIZON-WIDERA-2021-ACCESS-03
