LiV is a platform that leverages the power of Blockchain to democratise access to inheritance management, reducing inefficiencies and ensuring compliance.

**Objective**

LiV is a platform that leverages the power of Blockchain to democratise access to inheritance processes, reducing complexity, inefficiencies and ensuring legal compliance. LiV allows any person to:

- Make informed and simple decisions about their inheritance plan
- Protect their assets and inheritance from getting lost
- Prevent families’ fights and protect them from fraud
- Complete simple inheritance processes after death
- Manage, recover and regularise crypto inheritance

**Project Information**

**LiV**

Grant agreement ID: 101113879

**DOI**

[10.3030/101113879](10.3030/101113879)

**Funded under**

European innovation ecosystems

**Start date**

1 July 2023

**End date**

30 April 2024

**Total cost**

€ 0,00

**EU contribution**

€ 75 000,00

**Coordinated by**

LIVCARE SL

Spain
LiV also allows 3rd parties, Financial Institutions and Governments to manage inheritance processes more effectively and to better support their customers’ during distressful times.

LiV is creating a new seamless ecosystem which will completely reformulate the way these entities interact, work and engage. This will mean instant, transparent, cheaper and secure transactions for people and institutions. Our research has revealed that our blockchain approach is a game changing innovation that can potentially:

- Increase inheritance planning adoption from a current 50% to a 75% (3/4 interviewees would use LiV)
- Reduce dormant assets (€50bn) and crypto (20%) to potentially “0”
- Reduce time, costs and eliminate errors during inheritance processes by an average of 90%
- Enable web3 compliance
- Avoid sanctions to Financial Services and other entities

With this, LiV will set the foundations for further legal-tech services that will put the EU at the vanguard of legal-tech innovation in a market valued at ~$500 Bn (2028).

LiV provides access to legal services and contributes to build stronger institutions. With this LiV aims to contribute to the 16th United Nations Sustainable Development Goal and the European 2030 Digital Agenda.

LiV also provides a sustainable non-paper-based process, which we estimate could reduce CO2 emissions by 5 million kg per year just in the EU.
