INDEEP

Grant agreement ID: 101120480

Funded under
Marie Skłodowska-Curie Actions (MSCA)

DOI
10.3030/101120480

Total cost
€ 0,00

EU contribution
€ 2 735 136,00

Start date
1 February 2024

End date
31 January 2028

Coordinated by
Technological University of the Shannon: Midlands Midwest

Ireland

Objective

The INtervention on the DEterminants of, and Expertise in, Physical activity behaviours (INDEEP) research programme and training network will train a new generation of doctoral researchers who will gain expertise in innovative, interdisciplinary research activity in physical activity (PA) and health promotion. Specifically, the doctoral network will support the theoretical and applied development of the state-of-the-art of determinants of PA and evidence-based population level PA interventions, by promoting international, interdisciplinary and intersectoral mobility across the PA for health sector. Progressing the work achieved in the JPI HDHL DEDIPAC KH, COST Action CA19101 (DE-PASS) responded directly to the gaps and research needs in relation to the absence of European harmonised data on PA and their determinants. Grounded in DE-PASS, the INDEEP
network seeks to generate excellence in research and training, providing graduates that will advance the state-of-the-art in PA promotion, through a comprehensive understanding of the associated determinants. INDEEP addresses the need for a genuinely multidisciplinary approach to addressing the challenges of improving PA in youth and across the lifespan, arising from the poor efficacy of existing approaches to PA change. The network ultimately aims to provide an intervention development toolbox, supporting the integration of determinants of PA behaviours, behaviour change theory and intervention co-creation to aid in the development of evidence-based interventions which integrate top-down and bottom-up intervention approaches. Outcomes beyond the lifetime of this project have the potential to have important societal and global impacts, including contributing to achieve many of the Bangkok Declaration Sustainable Development Goals (SDGs), including contributing to good health and well-being, gender equality, work and economic growth, reduced societal inequalities, sustainable communities and climate action.

Fields of science

social sciences > sociology > gender studies > gender equality

Keywords

Physical Activity  Determinants of Physical Activity  Determinants of Behaviours
