Empowering physicians to provide every stroke treatment with the right treatment in time, with StrokeFlow

Fact Sheet

Project Information

**StrokeFlow**

Grant agreement ID: 190148118

**Funded under**
The European Innovation Council (EIC)

**DOI**
10.3030/190148118

**Start date**
1 March 2023

**End date**
28 February 2025

**Total cost**
€ 3 204 638,75

**EU contribution**
€ 2 235 809,50

**Coordinated by**
NICO-LAB BV
Netherlands

Project description

Innovative solutions for accurate stroke treatment

Every minute of delay in stroke treatment can increase the risk of death or disability. Stroke care specialists face significant challenges in providing effective treatment because they often lack the ability to quickly share accurate patient data with colleagues and may not have readily accessible information about the blood clot causing the stroke. As a result, stroke patients are often treated using a one-size-fits-all approach that may not be optimal for their individual needs. The EU-funded StrokeFlow project will develop ground-breaking technology and innovative solutions to enable physicians to treat every stroke patient in time with precise treatment.
Overall, the project will improve the speed and accuracy of patient data sharing and provide better access to information about the underlying causes of strokes.

Fields of science

medical and health sciences > clinical medicine > emergency medicine
medical and health sciences > basic medicine > neurology > stroke

Keywords

stroke emergency care artificial intelligence patient care automation personalized treatment communication & collaboration

Programme(s)

HORIZON.3.1 - The European Innovation Council (EIC) MAIN PROGRAMME

Topic(s)

HORIZON-EIC-2022-ACCELERATOROPEN-01 - EIC Accelerator Open
