Objective

The main objective of the project is to develop a common methodology for gathering information on biomass potential using terrestrial and earth observations. This objective will be achieved by the implementation of a systematic assessment work plan and will result in the establishment of a harmonised approach and an e-training tool for dissemination. The e-training environment will be an important tool for reaching the much-needed European harmonisation, whereas a Stakeholder Platform will facilitate access to reliable and common datasets on biomass potential and as such it will offer a more efficient use of the available European biomass feedstock. The project will: - Develop a common methodology for gathering information on biomass potential using terrestrial and earth observations - Use e-technologies for disseminating information, best practices on the use and applicability of developed harmonised methodology

Field of Science

/agricultural sciences/agricultural biotechnology/biomass
Programme(s)

FP7-ENERGY - Specific Programme "Cooperation": Energy

Topic(s)

ENERGY-2007-3.7-01 - Harmonisation of biomass resource assessment

ENERGY-2007-7.3-01 - Electricity network assets management

Call for proposal

FP7-ENERGY-2007-1-RTD

See other projects for this call

Funding Scheme

CSA-CA - Coordination (or networking) actions

Coordinator

GEONARDO ENVIRONMENTAL TECHNOLOGIES LTD

Address

Zahony U 7
1031 Budapest

Hungary

Activity type

Private for-profit entities (excluding Higher or Secondary Education Establishments)

EU Contribution

€ 228 617
