Objective

The objective of this project is to clarify and compare the complex process of transnationalism. During the past few years, transnationalism has attained ever greater importance and topicality due to the increase in transnational mobility of people. In order to attain a comprehensive and valid insight into the topic in question we adopt a multilevel approach. The research conducted in Estonia, Finland, France, Germany, India, Morocco, Turkey, and the United Kingdom addresses both policy documents and individual migrants, including labour migrants; posted workers; family-based migrants; humanitarian migrants, and foreign degree students. The focus lies on their transnational networks and political, economic, and socio-cultural activities. Moreover, the topic of transnational empowering is of central importance. The following transnational spaces will be taken as the main units to analyse the border-crossing relationships: Estonia/Finland, India/UK, Morocco/France, and Turkey/Germany. Research data will be gathered through content analysis of policy documents and semi-structured and life-course interviews among a selected sample of respondents in each participating country.
