Re-creation and building of capacities in Georgian ICT Research Institutes

Fact Sheet

Project Information

GEO-RECAP

Grant agreement ID: 266155

Closed project

Funded under
FP7-INCO

Start date
1 November 2010

End date
31 October 2012

Overall budget
€ 520 454

EU contribution
€ 397 719

Coordinated by
GEORGIAN TECHNICAL UNIVERSITY

Objective

GEO-RECAP will support Georgia in significantly enhancing the cooperation capacities of its leading ICT research centers, namely two Institutes of Georgian Technical University (GTU): GTU- MICM and GTU- IC). The project’s central goal is to initiate and significantly increase scientific cooperation between the ERA and both GTU-MICM and GTU-IC. This goal comprises the following specific objectives:

• O.1: To conduct a series of targeted networking events between members of the Georgian research institutes and key partners of the ERA to facilitate the formation of new cooperations and partnerships relevant to FP7.

• O.2: To provide comprehensive practical and theoretical training to members of the Georgian research institutes to develop/enhance their skills and competences with regard to acquiring and participating in FP7 projects (including proposal writing, IPR, EU project and contract management etc.).
• O.3: To develop a sustainable strategy for increasing the research centre’s regional coverage and to improve its response to the existing socio-economic conditions. The strategy will be developed by means of a comprehensive SWOT analysis carried out both at GTU-MICM and GTU-IC.

What makes GEO-RECAP special is the means by which it is implemented: Rather than just conducting a series of networking and training events and suggesting a strategy for further development, GEO-RECAP will be designed as a practical “training-on-the-job” and supported “learning-by-doing” action that will really empower the Georgian research centres by allowing them not only to learn but also put into practice everything that is relevant to sustaining themselves and actively integrating themselves into the international research community.

Last but not least, to ensure optimal suitability, all capacity building measures will not only be developed in direct collaboration and consultation with the Georgian research centres, but also with the relevant Georgian instance on policy level - the NCP for FP7 ICT ICARTI who is also part of the GEO-RECAP consortium.

Programme(s)
FP7-INCO - Specific Programme "Capacities": International co-operation

Topic(s)
INCO.2010-6.1 - Eastern Europe and South Caucasus: Moldova, Georgia, Ukraine, Belarus, Armenia, Azerbaijan
