Fiber Crops as a Sustainable Source of Bio-based Materials for Industrial Products in Europe and China

Fact Sheet

Project information

FIBRA

Grant agreement ID: 311965
Project website

Status
Closed project

Start date
End date
1 September 2012
30 November 2015

Funded under:
FP7-KBBE

Overall budget:
€ 1 243 161

EU contribution
€ 999 915

Coordinated by:
CENTRE FOR RENEWABLE ENERGY SOURCES AND SAVING FONDATION
Greece

Objective

The FIBRA network has as main target to link the research and development activities for fibre crop innovations carried out by universities and institutions in both EU and China. This proposal is set up to promote the communication between experts about the key issues of fibre crop production, processing and application, while attention towards quality and efficiency improvement, and product diversification will result in improved markets and enhanced economic scope for sustainable fibre crop production in EU and China. The creation of opportunities for networking and cooperation between experts from different disciplines from China and EU will result in a better exchange of know-how and is expected to bring the state of the art of fibre crop utilization to a higher level on both sides. The FIBRA network is set up to optimize the information exchange on specialized topics for fibre crop productivity, and innovation. The FIBRA network is to provide the basis for common R&D activities between Chinese and European partners. The FIBRA network will provide a long term vision on future common research activities on fibre crops that will contribute to the international policies of the EU and will improve researchers’ training opportunities.
Field of Science

attention
productivity
